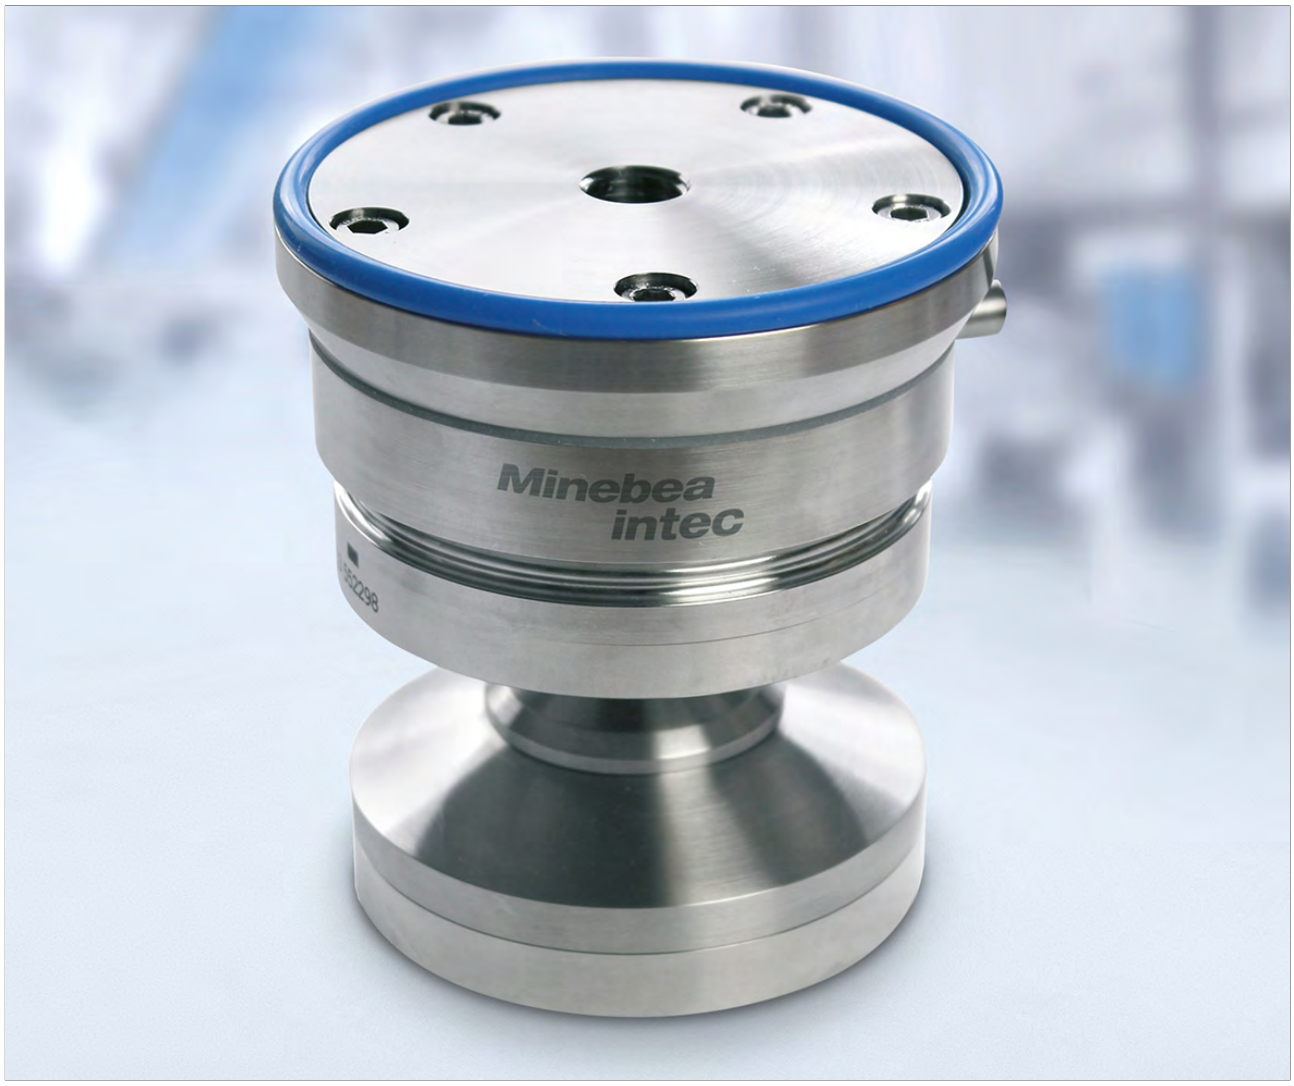
Installation Manual

Hygienic Weighing Module Novego®



Translation of the Original Installation Manual 9499 053 26100 Edition 1.15.0 10/05/2022

Minebea Intec GmbH, Meiendorfer Str. 205 A, 22145 Hamburg, Germany
Phone: +49.40.67960.303 Fax: +49.40.67960.383

Foreword

Must be followed!

Any information in this document is subject to change without notice and does not represent a commitment on the part of Minebea Intec unless legally prescribed. This product should only be operated/installed by trained and qualified personnel. In correspondence concerning this product, the type, name, and release number/serial number as well as all license numbers relating to the product have to be cited.

Note

Table of contents

1 Introduction

1.1 Read the manual

- Please read this manual carefully and completely before using the product.
- This manual is part of the product. Keep it in a safe and easily accessible location.

1.2 This is what operating instructions look like

1. - n. are placed before steps that must be done in sequence.

▶ is placed before a step.

▷ describes the result of a step.

1.3 This is what lists look like

- indicates an item in a list.

1.4 This is what menu items and softkeys look like

[ ] frame menu items and softkeys.

Example:

[Start]- [Applications]- [Excel]

1.5 This is what the safety instructions look like

Signal words indicate the severity of the danger involved when measures for preventing hazards are not followed.

⚠ DANGER

Warning of personal injury

DANGER indicates death or severe, irreversible personal injury which will occur if the corresponding safety measures are not observed.

▶ Take the corresponding safety precautions.

⚠ WARNING

Warning of hazardous area and/or personal injury

WARNING indicates that death or severe, irreversible injury may occur if appropriate safety measures are not observed.

▶ Take the corresponding safety precautions.

⚠ CAUTION

Warning of personal injury.

CAUTION indicates that minor, reversible injury may occur if appropriate safety measures are not observed.

▶ Take the corresponding safety precautions.

NOTICE

Warning of damage to property and/or the environment.

NOTICE indicates that damage to property and/or the environment may occur if appropriate safety measures are not observed.

▶ Take the corresponding safety precautions.

Note:

User tips, useful information, and notes.

Fax: +49.40.67960.474

eMail: help@minebea-intec.com

2 Safety instructions

2.1 General notes

NOTICE

Warning of damage to property and/or the environment.

The product was in perfect condition with regard to safety features when it left the factory.

- To maintain this condition and to ensure safe operation, the user must follow the instructions and observe the warnings in this manual.

2.2 Intended use

The Hygienic Weighing Module Novego®, consisting of load cell PR 6261/.. and pendulum base PR 6061/.., has been designed especially for weighing tasks using small and medium-sized process vessels.

The weighing module Novego® may be used only for weighing tasks as intended.

The dimensions of all mounting and structural components must be calculated so that sufficient overload capacity is ensured for all loads which may occur while taking the relevant standards into account. In particular, upright weighing objects (vessels or similar) must be safeguarded against the weighing installation turning over or being shifted, thus eliminating danger to people, animals, or goods even in the case of breakage of a weighing module.

In intrinsically safe circuits, only load cells PR 6261/..E may be used.

Installation and repair work must only be carried out by expert/qualified personnel.

The weighing module reflects the state of the art. The manufacturer does not accept any liability for damage caused by third-party system components or due to incorrect use of the product.

2.3 Initial inspection

Check the contents of the consignment for completeness. Check the contents visually to determine whether any damage has occurred during transport. If there are grounds for rejection of the goods, a claim must be filed with the carrier immediately. The Minebea Intec sales or service organization must also be notified.

2.4 Before operational startup

NOTICE

Perform visual inspection.

- Before operational startup as well as after storage or transport, inspect the weighing module (load cell with pendulum base) visually for signs of mechanical damage.

3 Recommendations for installation

3.1 Location of weighing modules

- The underframe of the vessels must be strong enough to support the specified loads, horizontal (water level!) and flat.

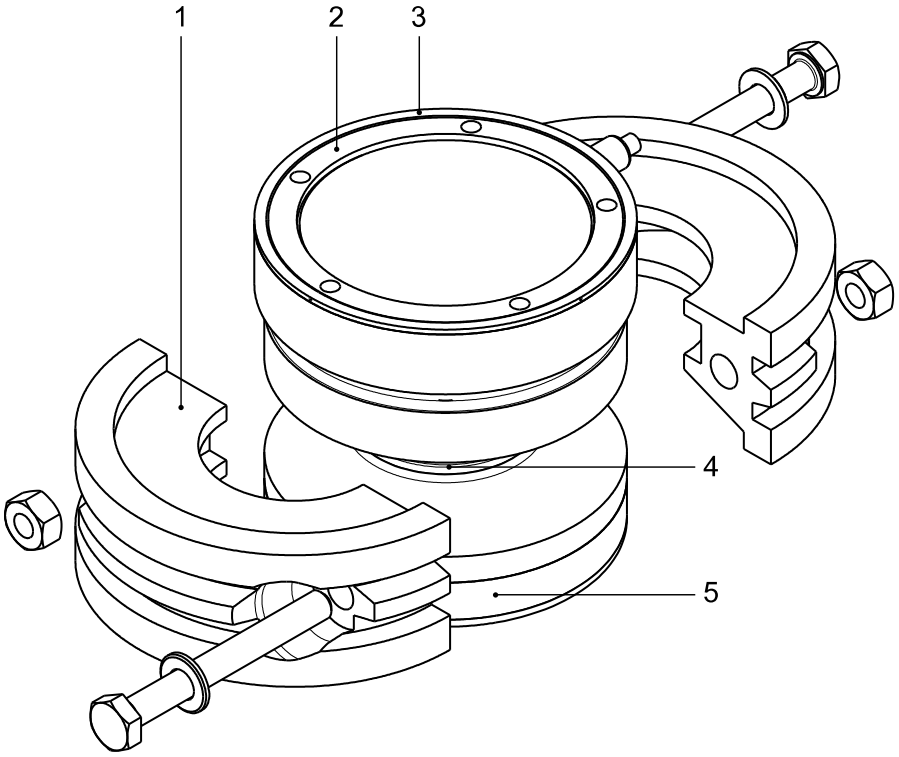
Note:

A pendulum base with tilt correction compensates for any inclination of ≤3°.

- Preferably, vessels should be installed on 3 weighing modules.
- The weighing modules should be arranged evenly over the entire vessel.
- Parasitic and/or horizontal forces and torques exceeding the permissible limits are disturbances which can generate measuring failures and, in the worst case, may damage the load cell.
- The pendulum bases absorb the occurring transverse forces within the limit values.
- No constrainer is necessary because of the 360° stopper integrated in the pendulum base.
- If 3 weighing modules are used, the weighing system can absorb 3 times the maximum capacity of transversal force.

4 Specifications

4.1 Equipment supplied with the weighing module



No.	Identifier
1	Transport lock (including screws, washers, and nuts)
2	Load cell PR 6261/..
3	Gasket
4	Pendulum pin with O-ring
5	Option: Pendulum base (depicted here: Pendulum base for frame mounting, see Chapter 11.1.) Other pendulum bases can be selected, see Chapter 11.
The following items are not shown:	
6	Drilling template for mounting without adapter plate (in the load cell packaging)
7	Drilling template for frame/ground installation (in the pendulum base packaging)
8	Quick guide
9	Calibration Certificate
10	Only with Ex-load cells: Safety information for Ex-load cells

4.2 General information

Restoring force	Displacement of the load cell onto the pendulum base generates a restoring force that increases with the force applied to the load cell. If the load cell is displaced by 2.5 mm, the pendulum base reaches its stopper.
Load cell material	Stainless steel 1.4418 acc. to DIN EN 10088-3
Material of pendulum base	Stainless steel 1.4301 acc. to DIN EN 10088-3 (corresponds to AISI 304, B.S. 304S15) and 1.4418 acc. to DIN EN 10088-3
Protection classes	in compliance with IEC 529 or DIN EN 60529 **IP66/IP68/IP69:** Dust-proof and leak-tight against water, with harmful effects when immersed, (1.5 m water depth, 10,000 h) and water jets (high pressure and temperature). **Explosion:** Suitable for explosion subgroup IIC and IIIC.
Protection type	Intrinsic safety for PR 6261/..E
Ambient temperature in the Ex area	see additional information “safety instructions for Ex load cells” only with approval RU C-DE.МЮ62.B.05836: -52...+55 °C
Cable diameter	5 mm
Cable length	5 m
Cable gauge	4×0.35 mm^2
Cable bend radius	≥25 mm (fixed installation) ≥75 mm (flexible installation)
Cable sheath material	Thermoplastic elastomer (TPE)
Cable sheath color	Gray (standard version) Blue (Ex version)

4.3 Possible marking of the load cell for the Ex area

Zone	Marking	Certificate no.	for

4.9 Technical data of the load cell

Designation	Description	Abbr.	C3/C3E	Unit
Accuracy class			0.015	% E_{max}
Maximum capacity	highest limit of specified measuring range	E_{max}	see Chapter 4.8.1	
Minimum dead load	lowest limit of specified measuring range	E_{min}	0	% E_{max}
Safe load limit	Highest load without irreversible damage	E_{lim}	150	% E_{max}
Destructive load	danger of mechanical destruction	E_d	>300	% E_{max}
Max. permissible lifting force	to still hold the specified performance afterwards		100	% E_{max}
Destructive lifting force	Danger of mechanical destruction (by lifting)		>300 but max. 3 t	% E_{max}

Designation	Description	Abbr.	C3/C3E	Unit
(Nominal) side force range	Range of side force to hold the specified performance	QK_n	≤20	% Load
Side force limit	Maximum side force without irreversible damage	E_{lq}	100 but max. 1 t	% E_{max}
Minimum LC verification	minimum load cell verfication interval, $v_{min} = E_{max}/Y$	Y	14000	
Deadload output return	Factor for dead load output return after load (DR = ½ * E_{max}/Z)	Z	3000	
Rated output	relative output signal at maximum capacity	C_n	2	mV/V
Tolerance on rated output	permissible deviation from rated output C_n	d_c	<0.07	% C_n
Zero output signal	load cell output signal under unloaded condition	S_{min}	0 to 1.5	% C_n
Repeatability error	max. change in load cell output for repeated loading	ε_R	<0.005	% C_n
Creep	max. change of output signal at E_{max} during 30 minutes	d_{cr}	<0.016	% C_n
Linearity deviation[1)]	Deviation from the best straight lines through zero	d_{Lin}	<0.01	% C_n
Hysteresis[1)]	max. difference in LC output between loading and unloading	d_{hy}	<0.016	% C_n
Temperature effect of the S_{min}	max. change of S_{min} in B_T	TK_{Smin}	<0.01	% C_n/10 K
Temperature effect on C[1)]	max. change of C in B_T	TK_C	<0.01	% C_n/10 K
Input impedance	between supply terminals	R_{LC}	1080 ±10	Ω
Output impedance	between measuring terminals	R_O	1010 ±1	Ω
Insulation impedance	between measuring circuit and housing, U_{DC} = 100 V	R_{IS}	>5000	MΩ
Insulation voltage	between circuit and housing (PR 6261/..E only)		500	V
Recommended supply voltage	to hold the specified performance	B_u	4 to 20	V
Max. supply voltage	permissible for continuous operation without damage	U_{max}	24	V
Nominal ambient temp. range	to hold the specified performance	B_T	-10 to +40	°C
Usable ambient temp. range	permissible for continuous operation without damage	B_{Tu}	-40 to +95	°C

Designation	Description	Abbr.	C3/C3E	Unit
Storage temperature range	without electrical and mechanical stress	B_{Ti}	-40 to +95	°C
Permissible eccentricity	permissible displacement from nominal load line	S_{ex}	2.5	mm
Vibration resistance	Resistance against oscillations (IEC 60068-2-6 Fc)		20 g, 100 h, 10 to 150 Hz	
Barometric pressure influence	influence of barometric pressure on output			
	for E_{max} 125 kg:	PK_{Smin}	<9	g/kPa
	for E_{max} ≥250 kg:	PK_{Smin}	<17	g/kPa
Nominal deflection	max. elastic deformation under nominal load			
	for E_{max} ≤500 kg:	S_{nom}	max. 0.1	mm
	for E_{max} ≥1 t:	S_{nom}	max. 0.2	mm

1) The data for non-linearity (d_{Lin}), hysteresis (d_{hy}) and and temperature effect on C (TK_C) are typical values.
For OIML R60 or NTEP approved load cells the sum of these values is within the permissible cumulative error limits.

Definitions acc. to OIML R60

The technical data given are intended solely as a product description and should not be interpreted as guaranteed properties in the legal sense.

NTEP: min. scale interval of the load cells v_{min}

	Type	Divisions n_{max}	125 kg	250 kg	500 kg	1 t	2 t	Unit
Class III Multiple	C3/C3E	5000	8.9	17.8	35.7	71.4	142	g
Class III L Multiple	C3/C3E	10000	7.8	7.8	11.9	23.8	47.6	g

4.10 Technical data for transport lock and PR 6061/06S

	@ max. capacity of load cell	Transport lock	PR 6061/06S
Max. vertical load	125 kg...500 kg	750 kg	750 kg
	1 t, 2 t	3 t	3 t
Max. horizontal load		1 t	1 t
Material		PA6GF30	PA6GF30

5 Installation

5.1 Prior to mounting

5.1.1 Preparing the substructure

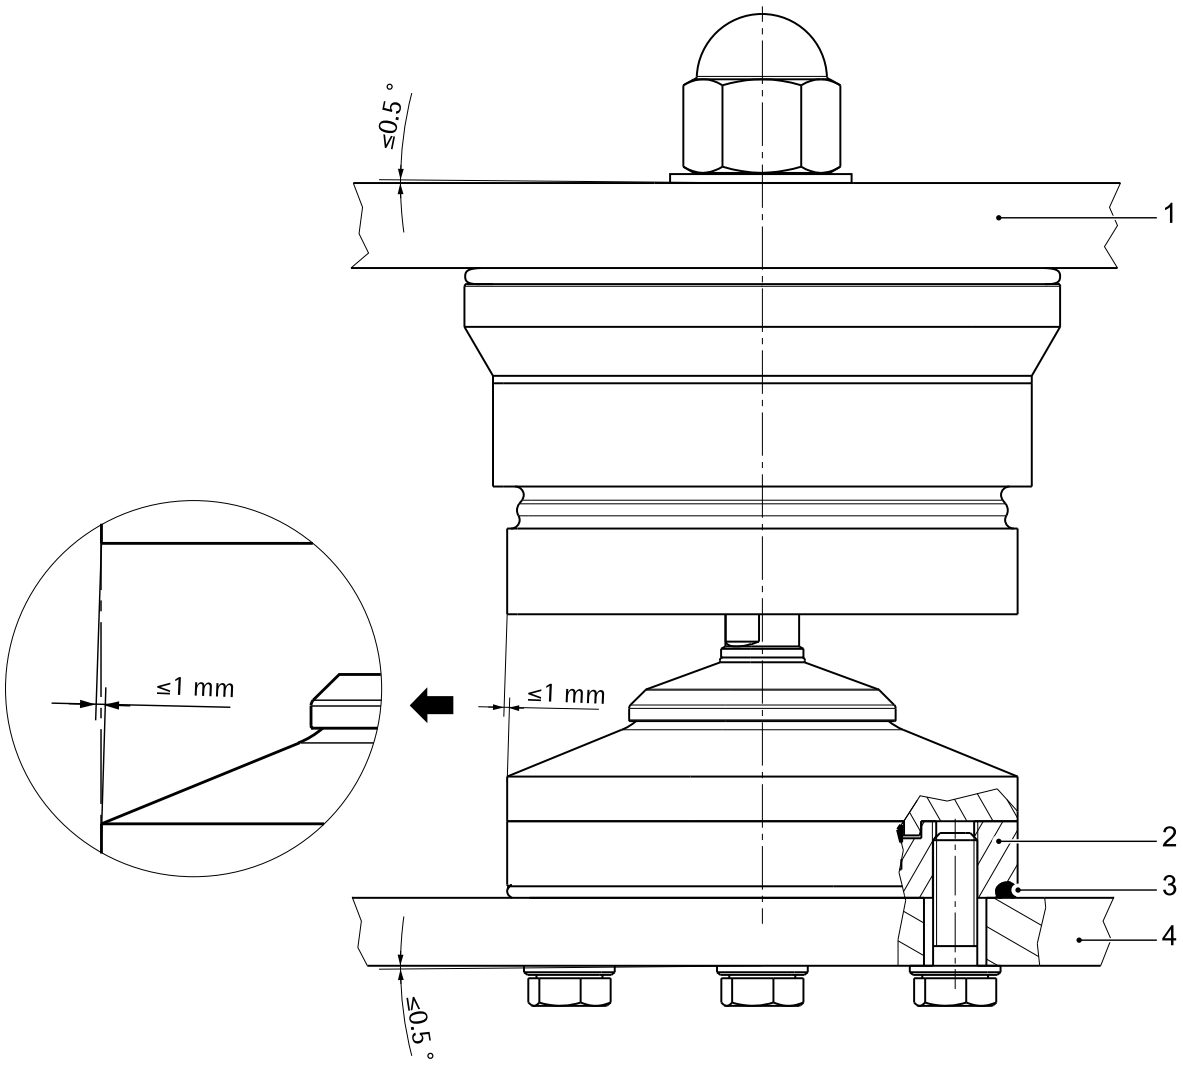
The substructure must be designed as follows for the pendulum base:

- horizontal (spirit level!) supporting/sealing surface

Note:

A pendulum base with tilt correction compensates for any inclination of ≤3°.

- flat supporting/sealing surface
- sufficient load carrying capacity for the provided loads



NOTICE

No leak-tightness of the supporting/sealing surface present between pendulum base and substructure.

- ▶ Leak-tightness between the pendulum base (2) and substructure (4) must be ensured using O-ring (3).

- ▶ The load distribution on the available load cells must be as even as possible to prevent overload of the individual load cells.
- ▶ Use the drilling template to generate the drilling pattern of the pendulum bases (see Chapter 4.4) according to the weighing system arrangement.
- ▶ The contact surfaces of the pendulum bases (2) and the contact surfaces of the vessel feet (1) must be arranged in parallel.
- ▶ It is imperative to observe the maximum permissible inclination (≤1 mm); refer to figure.

5.1.2 Preparing the ground

The ground must be designed as follows for the pendulum base:

- horizontal (spirit level!) supporting/sealing surface

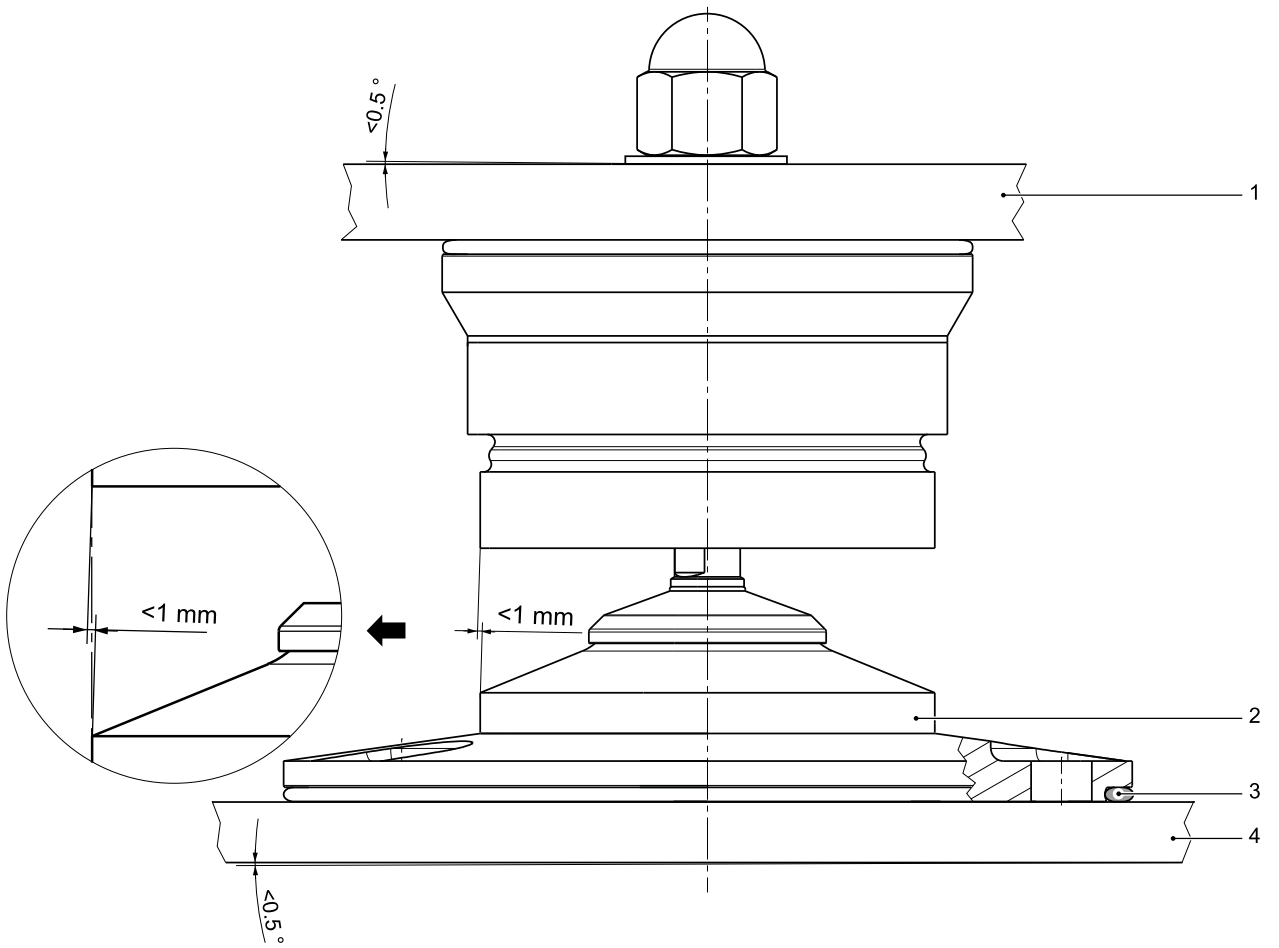
Note:

A pendulum base with tilt correction compensates for any inclination of ≤3°.

- flat supporting/sealing surface
- sufficient load carrying capacity for the provided loads

- ▶ The load distribution on the available load cells must be as even as possible to prevent overload of the individual load cells.
- ▶ It is imperative to observe the maximum permissible inclination; refer to figure!

5.1.2.1 For pendulum base without tilt correction



NOTICE

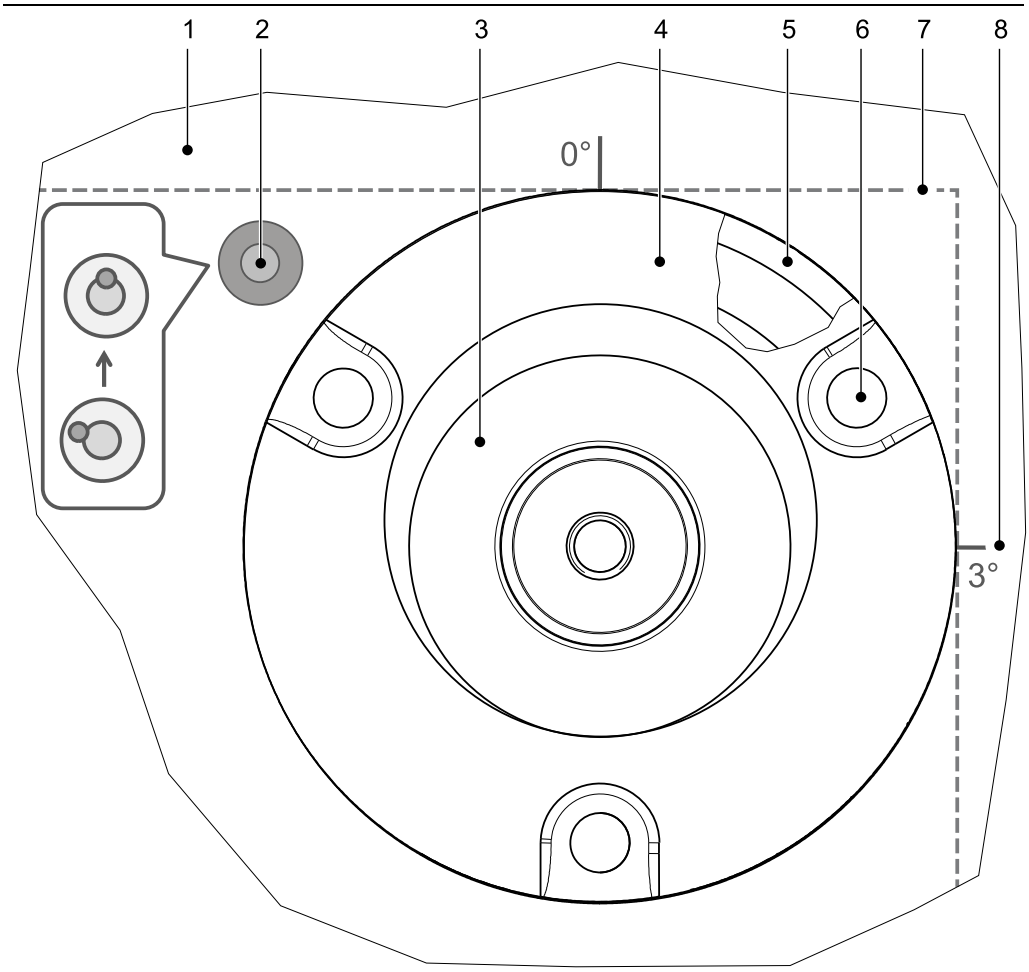
No leak-tightness of the supporting/sealing surface present between pendulum base and bottom.

- Leak-tightness between the pendulum base (2) and bottom (4) must be ensured using O-ring (3).

- The load distribution on the available load cells must be as even as possible to prevent overload of the individual load cells.
- Use the drilling template to generate the drilling pattern of the pendulum bases (see Chapter 4.5) according to the weighing system arrangement.
- For this purpose, place the template on the ground in order to the set the drill holes for the threaded anchor and mount it.
- The contact surfaces of the pendulum bases (2) and the contact surfaces of the vessel feet (1) must be arranged in parallel.

  The maximum permissible misalignment and the maximum allowable misalignment must be strictly observed, see Figure!

5.1.2.2 For pendulum base with tilt correction



Legend

No.	Identifier
1	Mounting and drilling template
2	Area for spirit level
3	Pendulum base, incl. No. 4 + 5
4	upper ground plate
5	lower ground plate
6	Drill holes
7	Fold lines
8	Guide lines

Note:

Please read the instructions thoroughly!

⚠ CAUTION

The pendulum base with tilt correction weighs approx. 4.2 kg.

Beware of any of a situation with light, reversible injuries as a result.

▶ Always work with appropriate protective equipment.

1. Position template (1) on the ground.
2. Remove the protective film of the two adhesive strips from the template.
3. Hold the lower plate (5) over the template (1) so that position 0° on the 0°-marking of the template and position 3° on the 3°-marking of the template show up.
4. Place the lower plate without pendulum base onto the template and press.
   ▷ The lower plate (5) is now fixed on the template.
5. Place the spirit level next to the marked field (2) of the template (1).
6. Turn the template until the level reaches the marked target orientation.
7. Place the pendulum base (3) using the pin (in the upper plate) onto the lower plate so that the 0°-marking of the upper plate (4) shows up on the 0°-marking of the lower plate.
8. Position the spirit level on the center on any hole of the pendulum base.
9. Rotate the template counterclockwise, in small steps, and the upper plate (4) of the pendulum base to the same extent in the clockwise direction until the bubble is centered.
10. Position the drill holes (6) with a center mark onto the template.
11. Mark the upper plate in position 0° of the lower plate with a felt-tip pen.
12. Fold the template at the fold lines (7).
13. Mark the positions 0° and 3° of the lower plate using the guide lines (8) on the back of the template with a felt-tip pen on the ground.
14. Remove template with pendulum base (3) from the ground.
15. Put holes for the screw anchors.
16. Then insert the threaded rods.

5.1.3 Preparing vessel foot

NOTICE

No leak-tightness of the supporting/sealing surface present between load cell and weighing object.

▶ It is essential to use adapter plate PR 6061/00S to prevent any negative effect on the measuring properties.

If you do not use the adapter plate (see Chapter 13.4), the surface supporting the load cell must fulfill the following requirements:

- Material: stainless steel
- Flatness: 0.05 mm
- The surface must not bend under the expected load (i.e. the defined flatness may not be exceeded). If the flatness exceeds the set limit, the bending forces will transfer to the mounted load cell and negatively affect its measuring properties. Especially its

lack of sensitivity to transversal forces will be negatively affected under these circumstances.

Installation with adapter plate

For information on creating a mounting option for an M16 connection with the weighing object, see Chapter 5.3.2.2.

Installation without adapter plate

Use the drilling template to generate the load cell drilling pattern (see Chapter 4.4) according to the weighing system arrangement.

Installation with height adjustment

Create the drilling pattern for an M8 connection with the weighing object using the drilling template for each vessel base according to the weighing system arrangement (see Chapter 4.7).

5.2 Tightening torques

The corresponding tightening torques are given in the following table.

Mounting parts	Thread	Washer	Tightening torque
Adapter plate/load cell	M6-A2-70		3.5 Nm
Pendulum base/support plate	M8-A2-70	*	16 Nm
Pendulum base/bottom	M8-A2-70 or M10-A2-50		16 Nm or 14 Nm
Weighing object/set screw/cap nut	M16		59 Nm
Weighing object/height-adjustment flange	M8-A2-70		16 Nm
Adapter plate/height-adjustment threaded bolt	M16		59 Nm
Pendulum pin	M12		30 Nm
* Recommendation for the washers of M8 mounting screws:	DIN 7349 (d = 21, h = 4) or DIN 9021 or ISO 7093-2 (d = 24, h = 2)		

5.3 Assembly

5.3.1 Safety instructions

⚠ WARNING

The vessel may turn over during mounting.

Securing the vessel against tipping is imperative.

▶ Use an appropriate lifting jack.

NOTICE

The gasket and the O-rings are delicate mounting parts.

▶ Do not use any sharp-edged tools.

NOTICE

No leak-tightness of the contact surfaces present.

▶ The contact surfaces between the adapter plate and vessel foot/lug as well as between pendulum base and substructure/bottom must be clean and level to ensure a reliable seal.

Note:

The load cell is packaged together with the pendulum pin including O-ring and gasket.

The pre-mounted pendulum base is delivered with a separately-packaged O-ring.

NOTICE

Welding or lightning strike current flowing through the cell can damage it.

All electrical welding on the weighing system must be finished before mounting the load cells.

▶ When installing the load cell, immediately bypass the load cell with the flexible copper strap provided for this purpose.

During any additional electrical welding work near the load cell:

- Disconnect the load cell cables.
- Bypass the load cell.
- Make sure that the grounding clamp of the welding set is fitted as closely as possible to the welding joint.

The following must be observed during installation:

- Do not lift or transport the load cell by pulling on the cable.
- Avoid shock stress (falling down, hard shocks).

NOTICE

Changes of temperature >15 K/h may influence the measuring accuracy.

▶ Make sure to protect the load cells from direct heating or cooling effects (sun, wind, heat radiation, fan heaters), e.g., heat protection screens or heat protection housings are to be installed if necessary.

NOTICE

Force shunts may cause measuring errors.

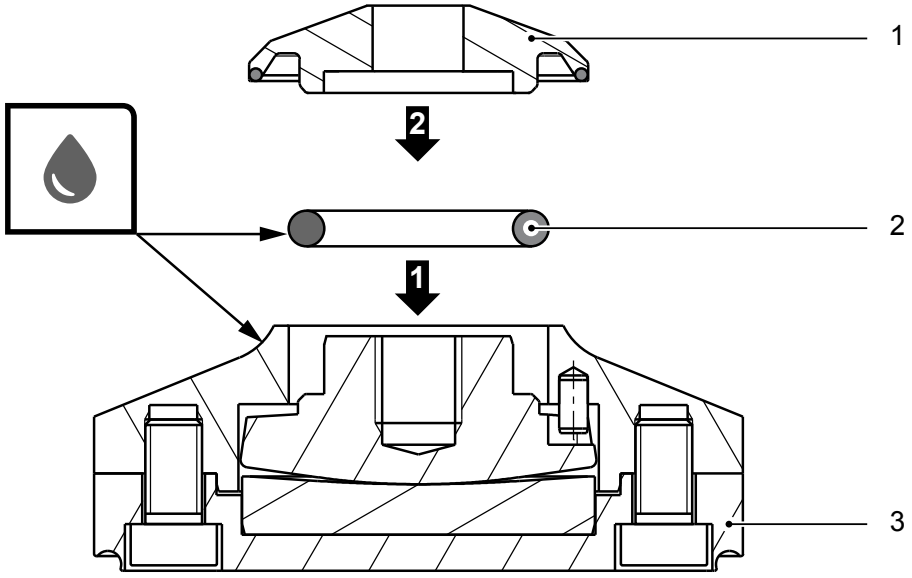
▶ All incoming and outgoing lines (hoses, pipes, cables) must be coupled to the measured object as flexibly as possible.

5.3.2 Mounting the weighing module

Note:

The following describes how to mount the load cell with the adapter plate PR 6061/00S (see Chapter 13.4).

The operations must be performed at all supporting points (e.g. vessel foot) of the weighing object (e. g. vessel).



1. Remove the O-ring (2) from the packaging of the load cell.

NOTICE

The restoring force is not suitable for the load cell.

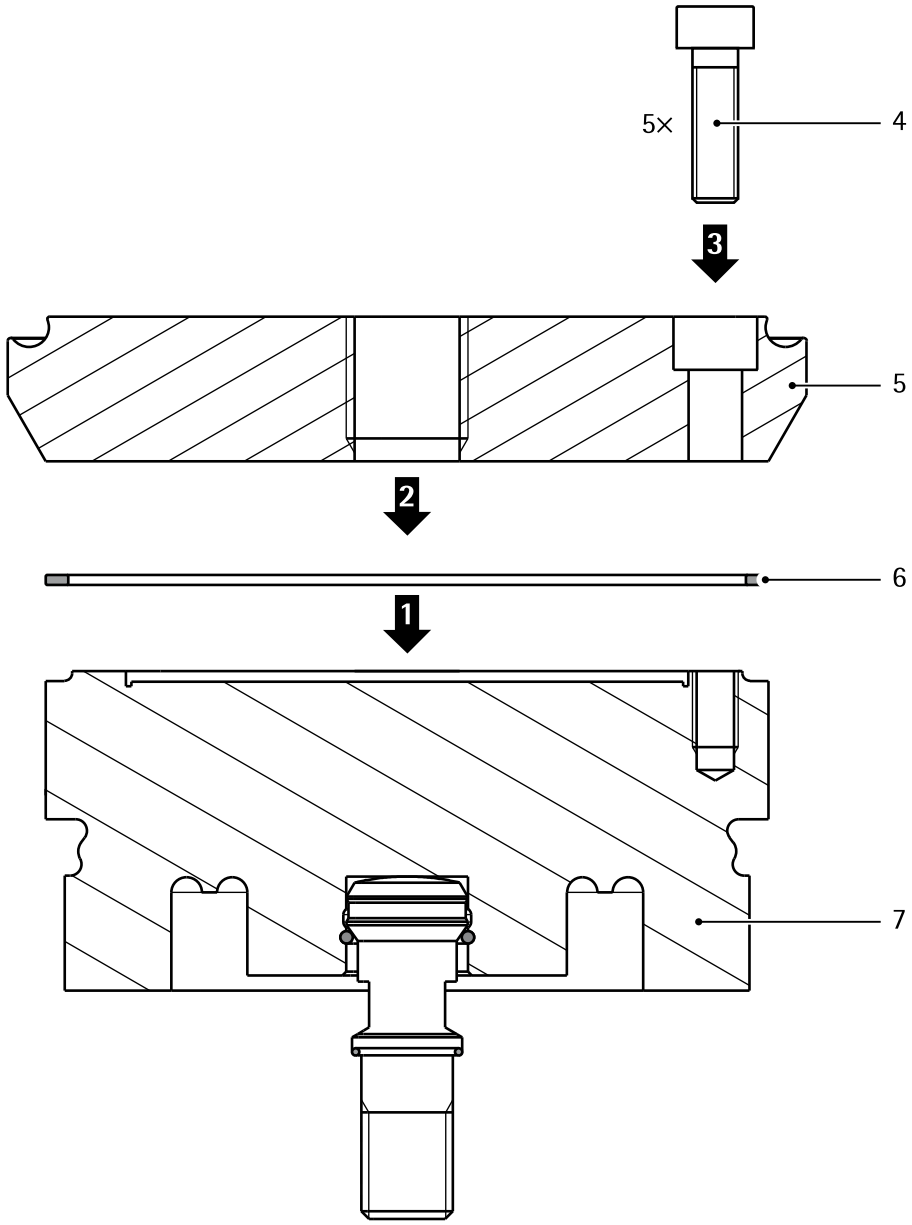
▶ Use only the O-ring supplied with the load cell.

2. Remove cap (1) of the pendulum base (3).
3. Apply the grease on the O-ring (2) and the bearing surface of the cap O-ring (1) (see symbol in the figure).

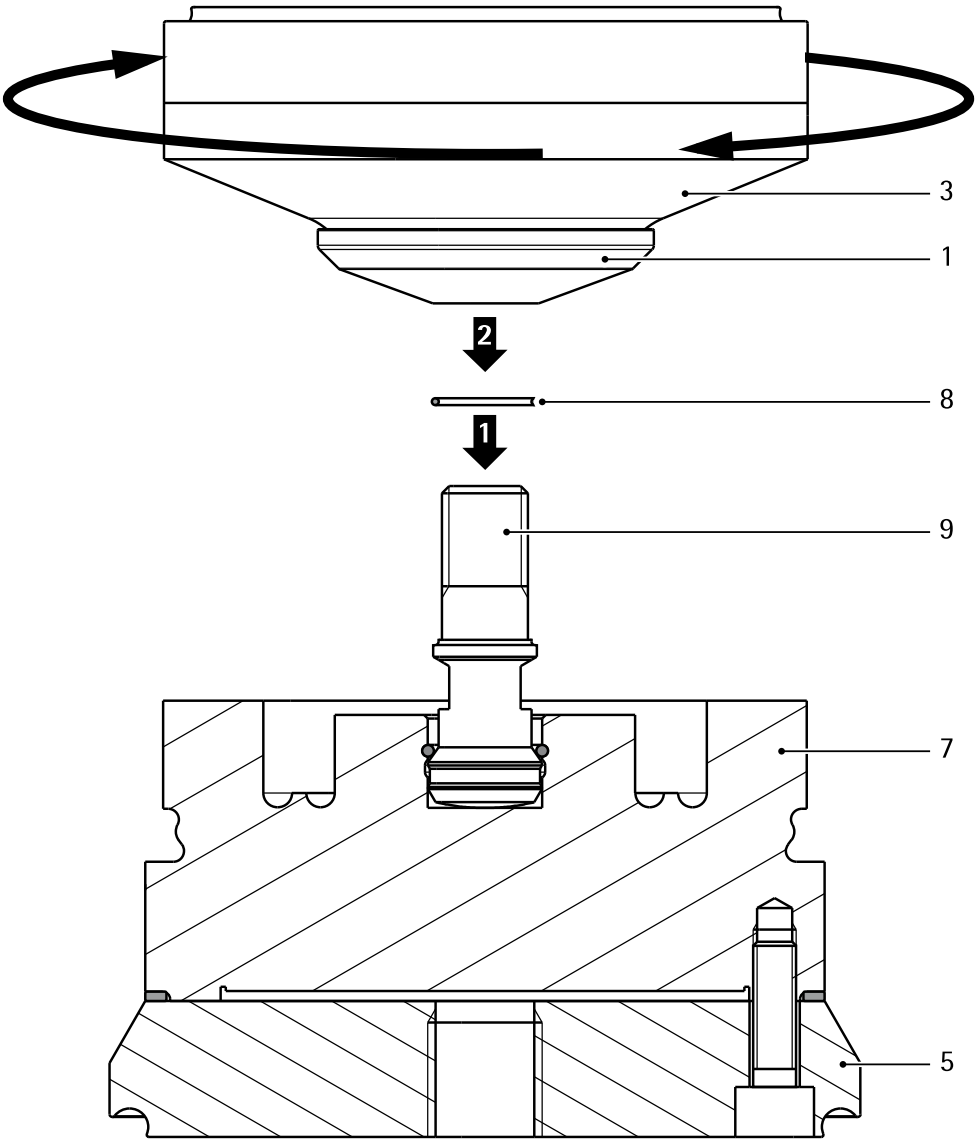
   Order no. see Chapter 12.
4. Insert the O-Ring (2) into the pendulum base and re-attach the cap.

Note:

The cap (1) lies loose on the pendulum base (3).



5. Check if all threaded holes required for mounting in the vessel foot/lug are provided.
6. Place gasket (6) into the corresponding groove of the load cell (7).
7. Screw adapter plate (5) onto the load cell using screws (4; 5x M6). It is essential to observe the tightening torques of the screws (see Chapter 5.2).
8. Check that the gasket is positioned correctly (6).
9. As needed, loosen the screws, correct the position and tighten the screws again.



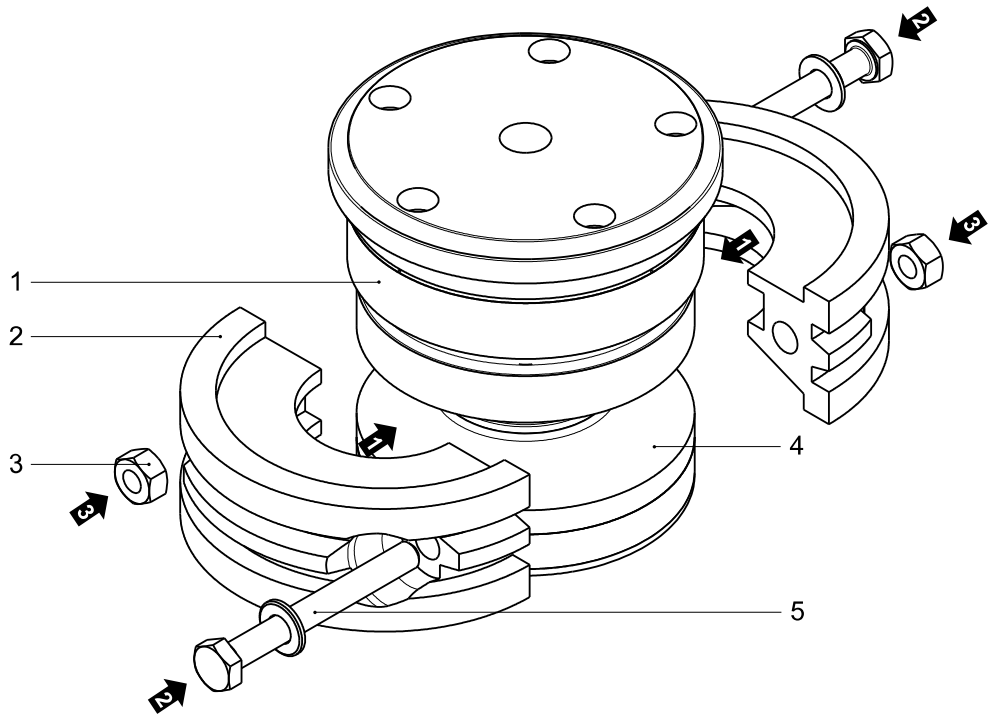
10. Turn over the adapter plate (5) with load cell (7) and place it on a flat surface.
11. Insert O-ring (8) into the groove of the pendulum pin (9).

Note:

The cap (1) lies loose on the pendulum base (3).

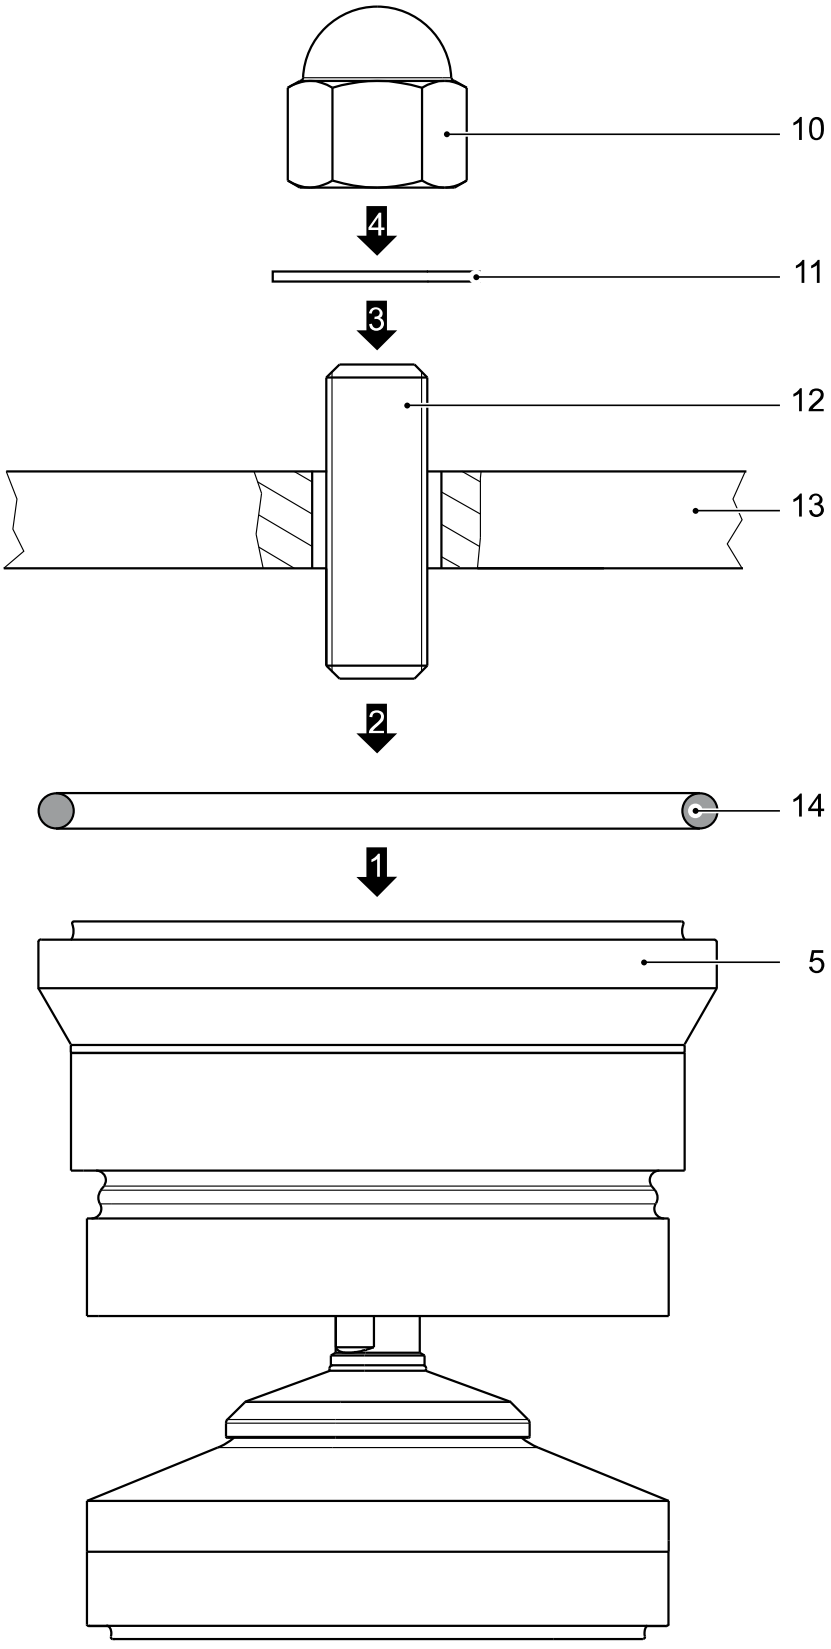
12. Firmly hold the cap (1) while screwing the pendulum base (3) onto the pendulum pin (9), then tighten. Make sure to use the correct tightening torque (see Chapter 5.2).

5.3.2.1 Installing the transport lock



1. Slide both half-shells (2) between the load cell (1) and pendulum base (4).
2. Push both screws (5) with washers through the drill holes of the half shells and connect them together by tightening the nuts (3).
3. After assembly of the weighing object (e. g. container), remove both half-shells.

5.3.2.2 Assembly without height adjustment



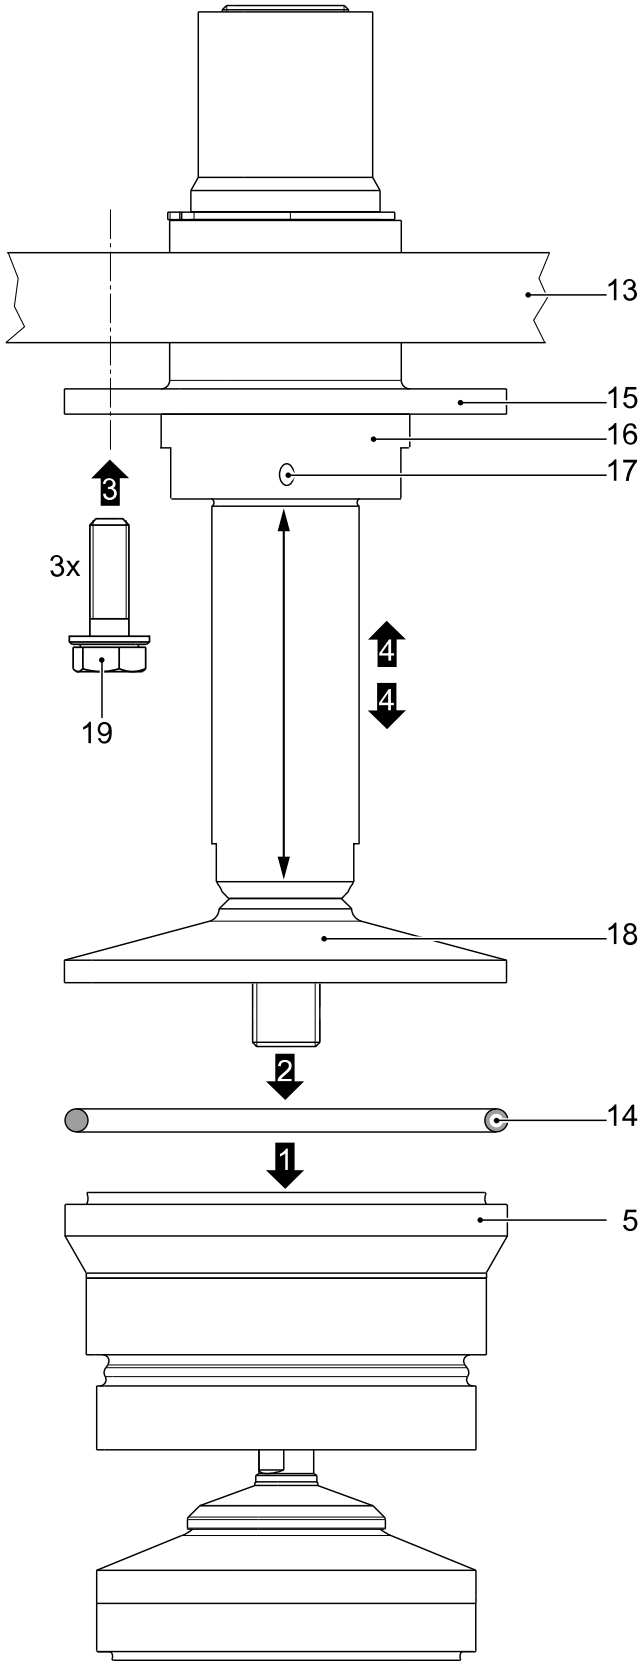
Representation without transport lock

1. Insert the O-ring (14) into the groove of the adapter plate (5).
2. Screw the set screw (12) into the adapter plate (5).
3. Assemble the complete module on the vessel foot/lug (13) using the disk (11) and cap nut (10). Make sure to use the correct tightening torques (see Chapter 5.2).

Note:

If the vessel foot has an M16 drill hole, the set screw (12) can be screwed in directly.

5.3.2.3 Assembly with height adjustment



Representation without transport lock

Note:

The following tools are required:

- Screwdriver SW13 for M8 screws (19).
- Screwdriver SW30 for adapter plate screws (5).
- Screwdriver SW30 for height adjustment using adjustment sleeve (16).
- 2.5 mm Allen key for securing the height adjustment.

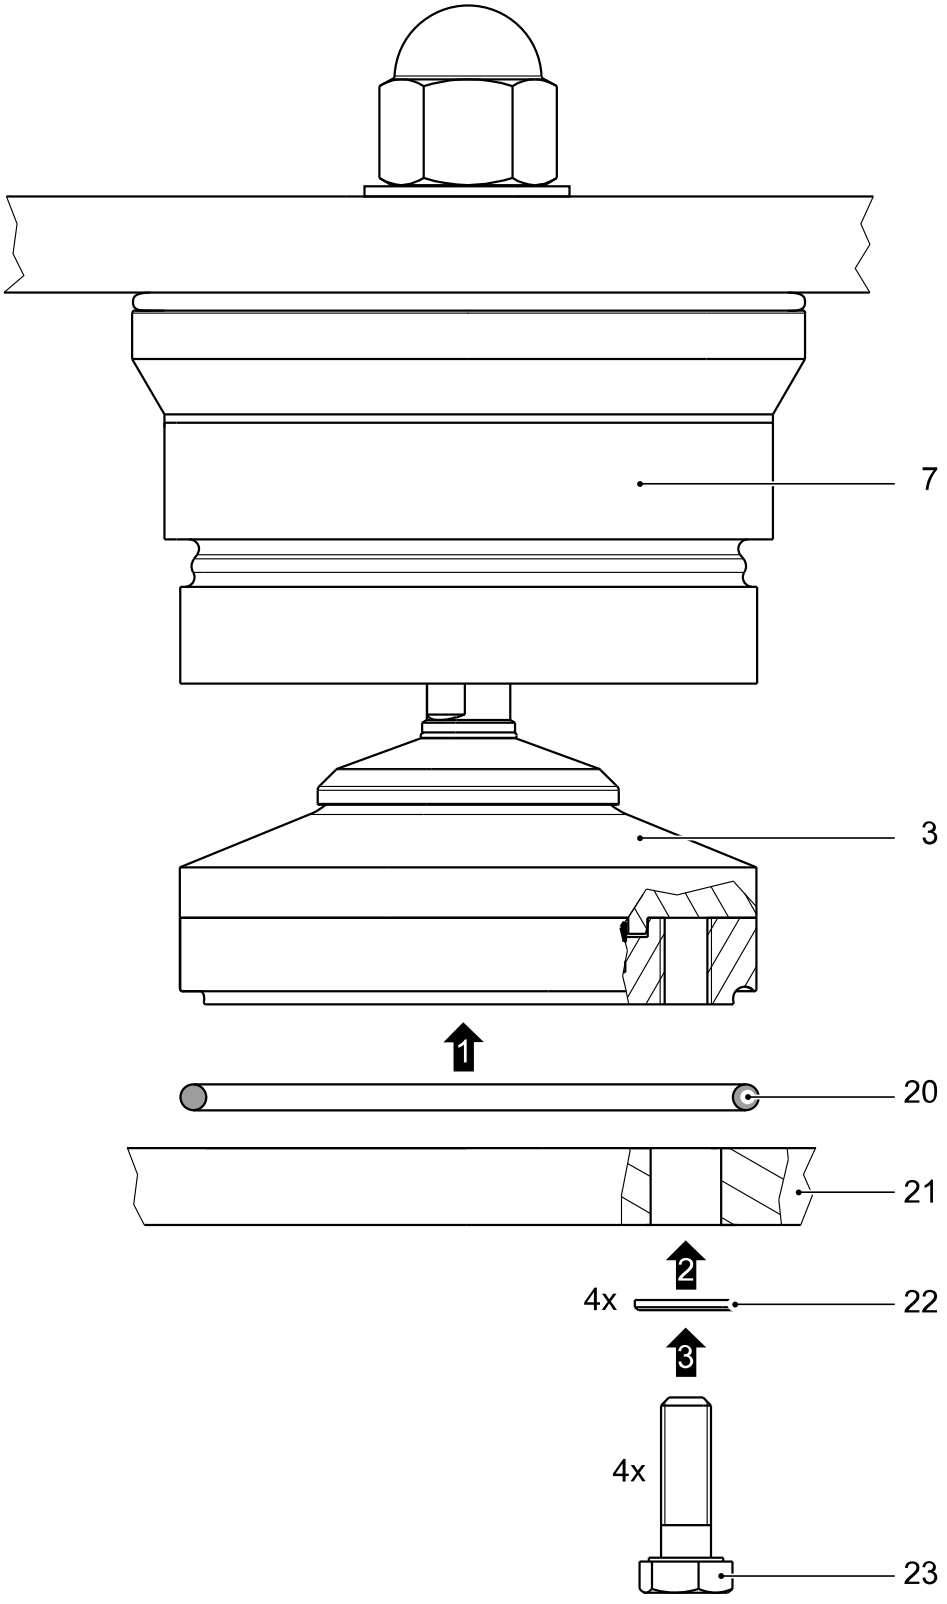
1. Fit flange (15) to the vessel foot (13). Make sure to use the correct tightening torques (see Chapter 5.2).
2. Insert the O-ring (14) into the groove of the adapter plate (5).
3. Screw the height adjustment (18) into the adapter plate (5). Make sure to use the correct tightening torques (see Chapter 5.2).
4. Loosen the 2 pin screws (17).
5. Adjust the height using the adjustment sleeve (16).

   The arrow on the height adjustment limits the adjustment range (80...160 mm).
6. Secure the adjustment using 2 pin screws (17).

5.3.2.4 Assembly steps for frame mounting

Note:

The transport and installation kit PR 6061/06S facilitates the centering of the hygienic weighing module Novego® during installation, see Chapter 13.7.



Representation without transport lock or transport and installation kit PR 6061/06S

1. Place the weighing object (e.g. vessel) including the weighing modules hanging on it onto the substructure (21).

2. Employ the appropriate lifting tool to slightly lift the container or every position with load cell (7) individually so that the pendulum base (3) can be turned and the threaded holes in the pendulum base can be aligned with the holes in the substructure (21).
3. Insert the O-ring (15) into the groove of the pendulum base.
4. From below, screw the pendulum base (3) to the substructure (21) screws (22, washer 4×; 23, screw 4× M8). Always comply with the strength classes and tightening torques of the connector elements (see Chapter 5.2).

NOTICE

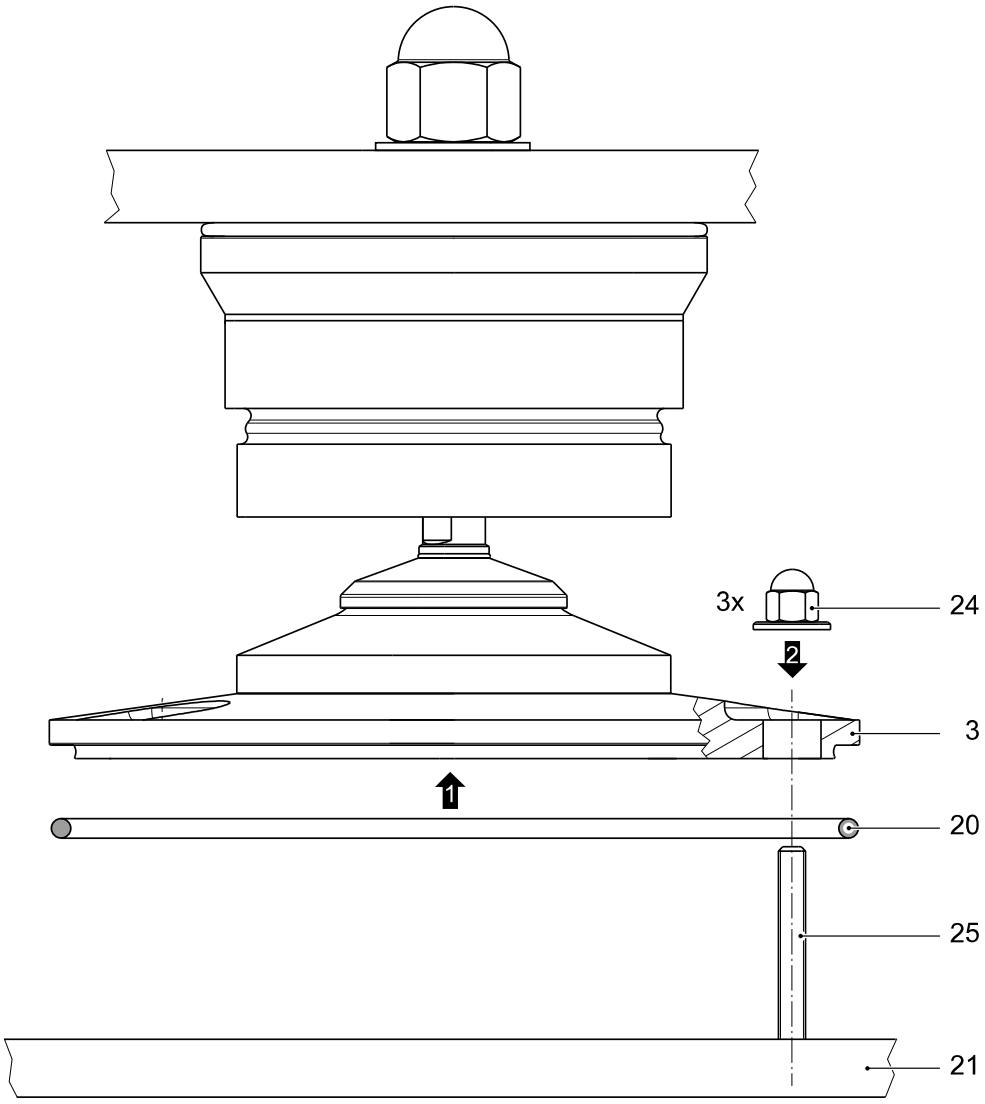
Never vertically straighten up a tilted pendulum base by pulling on the screws.

▶ It is essential to observe a tolerance of ≤1 mm (see Chapter 5.1.1).

5.3.2.5 Installation steps for ground installation without tilt correction

Note:

The transport and installation kit PR 6061/06S facilitates the centering of the hygienic weighing module Novego® during installation, see Chapter 13.7.



Representation without transport lock or transport and installation kit PR 6061/06S

1. Slowly lower the weighing object (e.g. vessel) including the attached weighing modules towards the bottom (21). While doing so, align the drill holes of the pendulum bases (3) over the threaded bars (25).
2. Insert the O-ring (20) into the groove of the pendulum base (3).
3. Tighten pendulum base (3) using nut (24). Always comply with the strength classes and tightening torques of the connector elements (see Chapter 5.2).

NOTICE

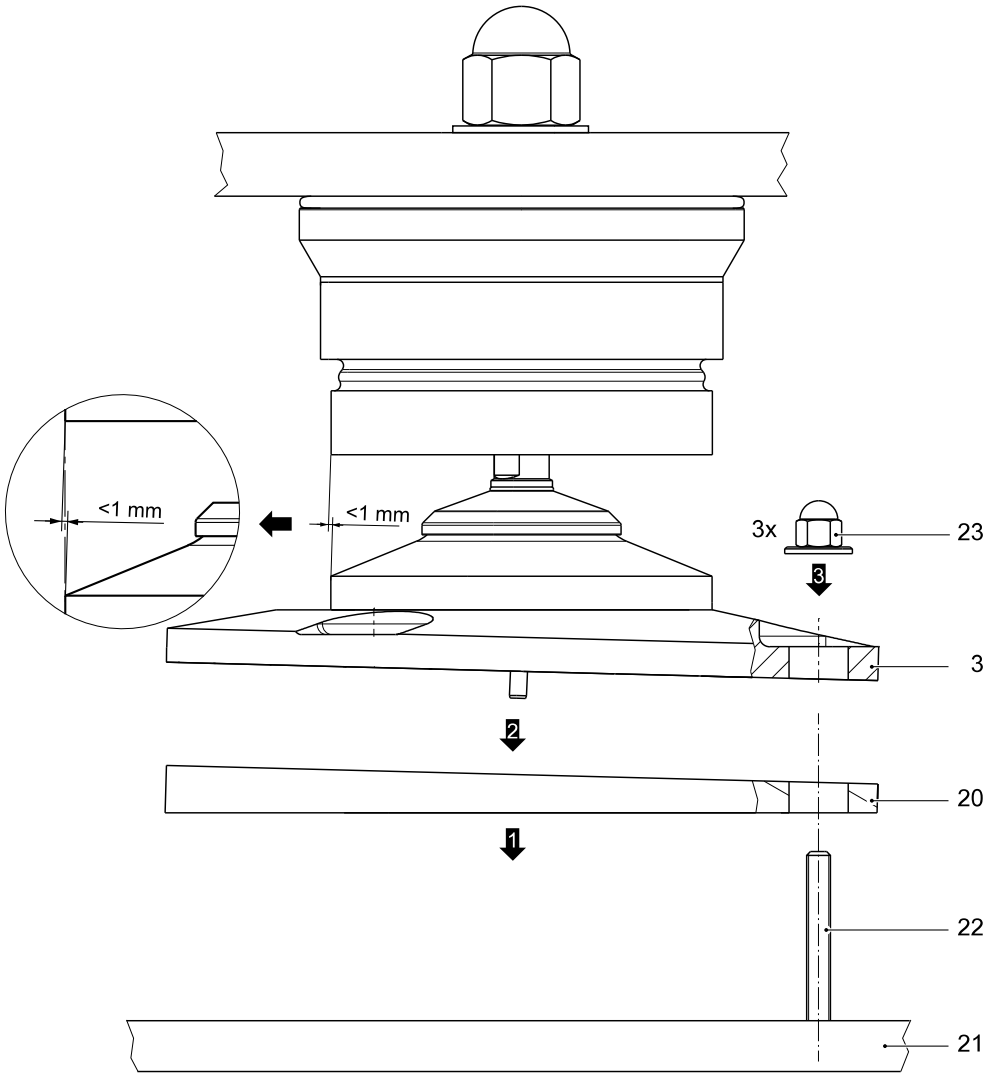
Never vertically straighten up a tilted pendulum base by pulling on the screws.

▶ It is essential to observe a tolerance of ≤1 mm (see Chapter 5.1.2).

5.3.2.6 Installation steps for ground installation with tilt correction

Note:

The transport and installation kit PR 6061/06S facilitates the centering of the hygienic weighing module Novego® during installation, see Chapter 13.7.



Representation without transport lock or transport and installation kit PR 6061/06S

1. Place the lower plate (20) using the 0°/3°-marking onto the bottom (see Chapter 5.1.2.2 operating step 11).
2. Slowly lower the weighing object (e.g. vessel) including the attached weighing modules towards the bottom (21). While doing so, align the drill holes of the pendulum bases (3) over the threaded bars (22).
3. Align the upper plate of the pendulum base (3) using the 0° marking of the lower plate (see Chapter 5.1.2.2 operating step 10).
4. Tighten pendulum base (3) using nut (23). Always comply with the strength classes and tightening torques of the connector elements (see Chapter 5.2).

   It is imperative to observe the maximum permissible inclination; refer to figure!

6 Connection

6.1 General information

- Protect the cable ends against contamination. Moisture must not get into the open end of the cable.
- Do not shorten the load cell connecting cable. Connect the prepared cable end and roll up the remaining cable.
- The cable screen may be connected only to the connecting terminals of the indicator.
- Keep the load cell cables away from power cables.
- The distance between measurement cables and power cables and/or components under high voltage should be at least 1 m (reference value).
- We recommend laying the load cell cables in separate cable trays or armored steel pipes.
- Power cables should be crossed at right angles while taking into account the minimum distance of 1 m (reference value).

Note:

If hum interference occurs, the cable screens should only be connected on one side.

Depending on the design of the cable junction box used, either the jumper J3 must be removed or the cable screens must be disconnected from the terminal contacts highlighted in yellow.

⚠ WARNING

When installing in potentially explosive atmospheres:

It is imperative that you follow the application-dependent installation instructions!

▶ Always check whether it is permissible to bilaterally connect the screens to the equipotential bonding.

6.2 Load cell

gy	=	gray
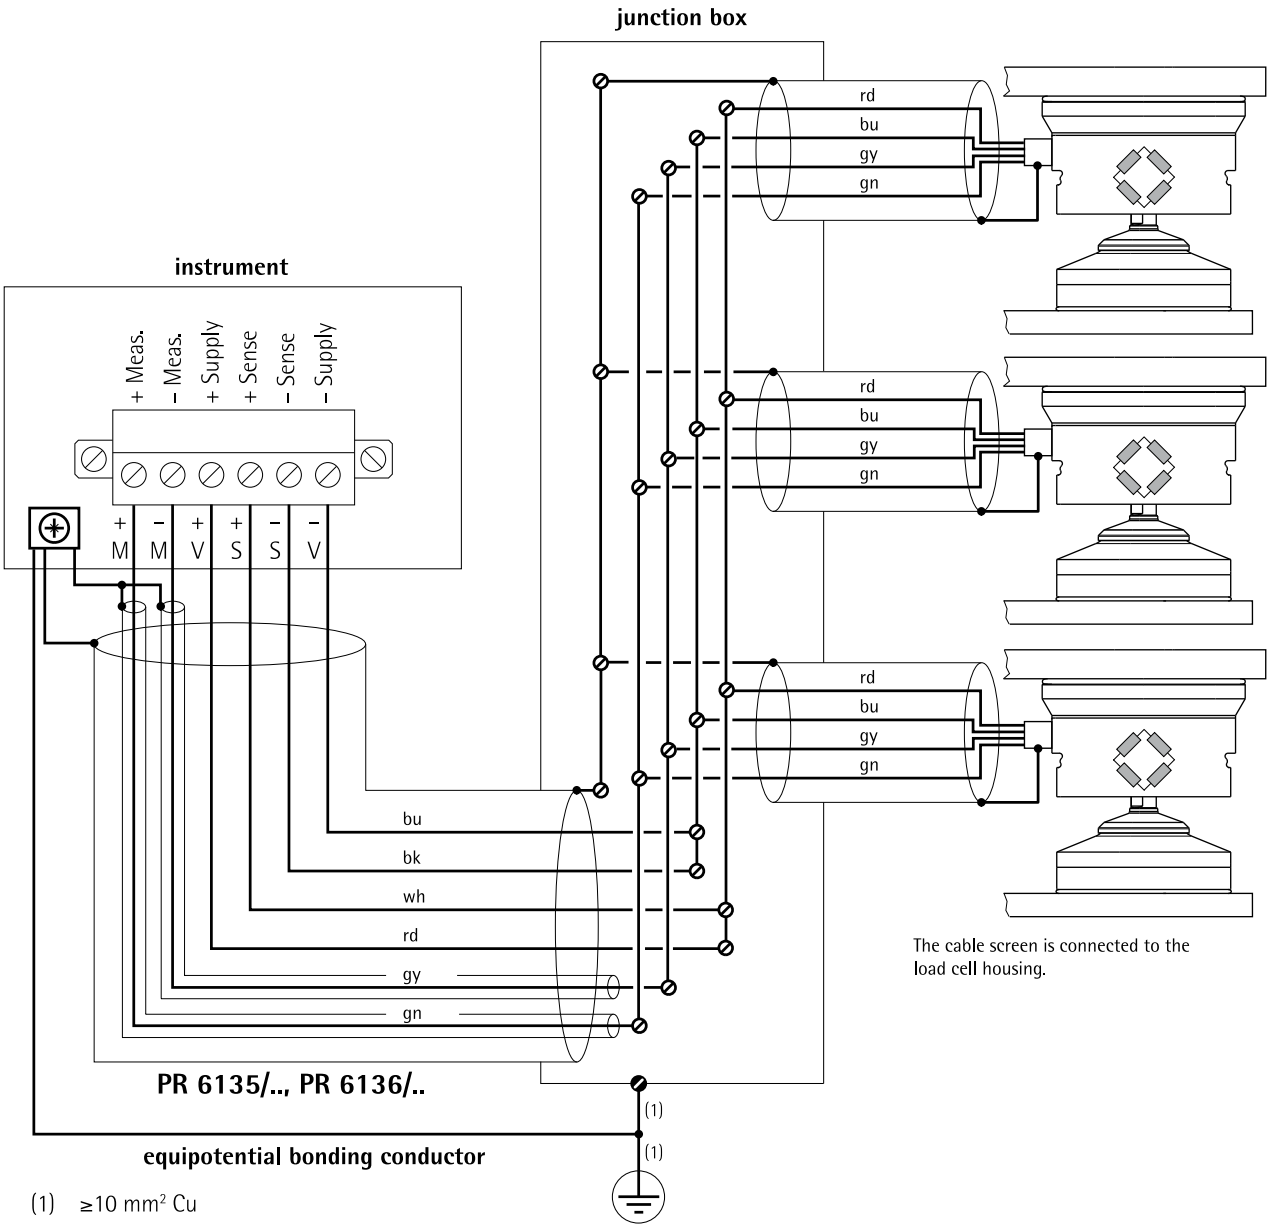
rd	=	red
wh	=	white

Connection example



7 Preparing for calibration

7.1 General notes

Note:

For calibration of the measuring system, please refer to the manual of the corresponding indicator.

7.2 Smart Calibration

When using Minebea Intec devices, we recommend always running "Smart Calibration" first.

This allows all required values to be extracted from the Calibration Certificate supplied.

- The "Hysteresis correction values for Smart Calibration" listed on the Calibration Certificate are entered for [Correction A] and [Correction B] under [Hysteresis error] - [specified] in the indicator.

  If the values are not available on the Calibration Certificate, [Hysteresis error] - [not specified] must be selected.
- The value listed under "Output at max. capacity" on the Calibration Certificate is entered in the indicator under [LC output at max. capacity].
- The value listed under "Output impedance" on the Calibration Certificate is entered in the indicator under [LC output impedance].

By performing these steps, a logical and highly accurate reading (typically better than 0.1%) is generated before the scale is even loaded for the first time.

7.3 Mechanical height adaptation

To distribute the load over the load cells as evenly as possible, height adaptation is required in systems with more than 3 load cells prior to calibration.

Procedure:

1. Place the dead load (e.g. empty vessel) onto the load cells of the scale structure.
2. Energize the load cells in parallel with a stabilized voltage (e.g.: U_{DC} = 12 V).
3. Measure the output voltages of each individual load cell by means of a digital voltmeter and compare the individual values.
   ▷ Given deviation between the output voltages of the load cells, the load on the load cell with the lowest output voltage must be increased by putting shims between mounting plate and weighing construction.
4. Lift the weighing object immediately beside the affected load cell.
5. Place sheets of metal from the set of metal sheets PR 6061/05S (also refer to Chapter 13.6) between adapter plate and scale structure.
6. Measure the output voltages of the load cells again and adjust the height of this load cell or of another one.

8 Troubleshooting

8.1 General Notes

The following hints will enable a technician to do an initial diagnostic or help in case of incorrect or non-reproducible weighing results after commissioning and calibration.

8.2 Visual inspection

Component	Possible errors
Weighing object	Are all pipes, hoses and cables free from shunt forces? Are the connections pliable and connected horizontally? Are elements with a solid connection to the scale in direct contact with the surroundings? Has friction developed between the weighing object and its surroundings (e. g. dusty openings, ...)?
Cable junction box	Has moisture intruded? Do all soldering and screw connections have secure contact?
Connecting cables	Is the sheath damaged? Has moisture intruded?
Load cell	Is the pendulum base parallel to the contact area? Is the displacement between the load cell and the pendulum base ≤1 mm? Is the sheath of the load cell cable damaged? Has moisture penetrated into the load cell cable?

8.3 Metrological controls

8.3.1 Checking the zero output signal of the load cell

- Unload load cell.
- Disconnect the load cell measuring outputs.
- Check whether the output voltage without load is within the limits.

Type	Output voltage
C3	0... +0.03 mV/V

8.3.2 Checking the strain gauge bridge of the load cell

- Do not exceed the test voltage.
- Check whether the values of the resistors are within the permissible limits.

Max. test voltage

- Standard version U_{DC} = 32 V
- Intrinsically safe version (PR ../..E) U_{DC} = 25 V

Type	Input impedance (red core, blue core)	Output impedance (green core, gray core)
C3	1080 Ω ±10 Ω	1010 Ω ±1 Ω

8.3.3 Checking the insulation impedance of the load cell

NOTICE

Possible destruction of load cell

- ▶ Never apply test voltage between two cores of the load cell cable.
- ▶ Insulate the load cell cores.

Max. test voltage

- Standard version U_{DC} = 100 V
- Intrinsically safe version (PR ../..E) U_{AC} = 500 V

Insulation impedance	Core – housing	>5000 MΩ
	Core – screen	>5000 MΩ
	Screen – housing	0 Ω

8.3.4 Checking the insulation impedance of the connecting cable

- Disconnect connecting cable from measuring instrument and load cells.
- Insulate the cores of the connecting cable.

Insulation impedance	Core – core	>120 MΩ × km
	Core – screen	>120 MΩ × km

9 Servicing/repairs/cleaning

9.1 Care and maintenance

9.1.1 Maintenance

The load cell PR 6261 is maintenance-free.

Load cell grease specification

- good water/media resistance
- good corrosion protection properties
- good oxidization and aging stability
- good temperature resistance
- and, where appropriate, good compatibility with foodstuffs

The requirements referred to apply when taking into account the specific operating/ usage conditions.

The grease also serves as protection against wear (low friction).

9.1.2 Replacing the load cell

⚠ WARNING

The vessel may turn over during de-/mounting.

Securing the vessel against tipping is imperative.

▶ Use an appropriate lifting jack.

NOTICE

Defects in the load cell may occur.

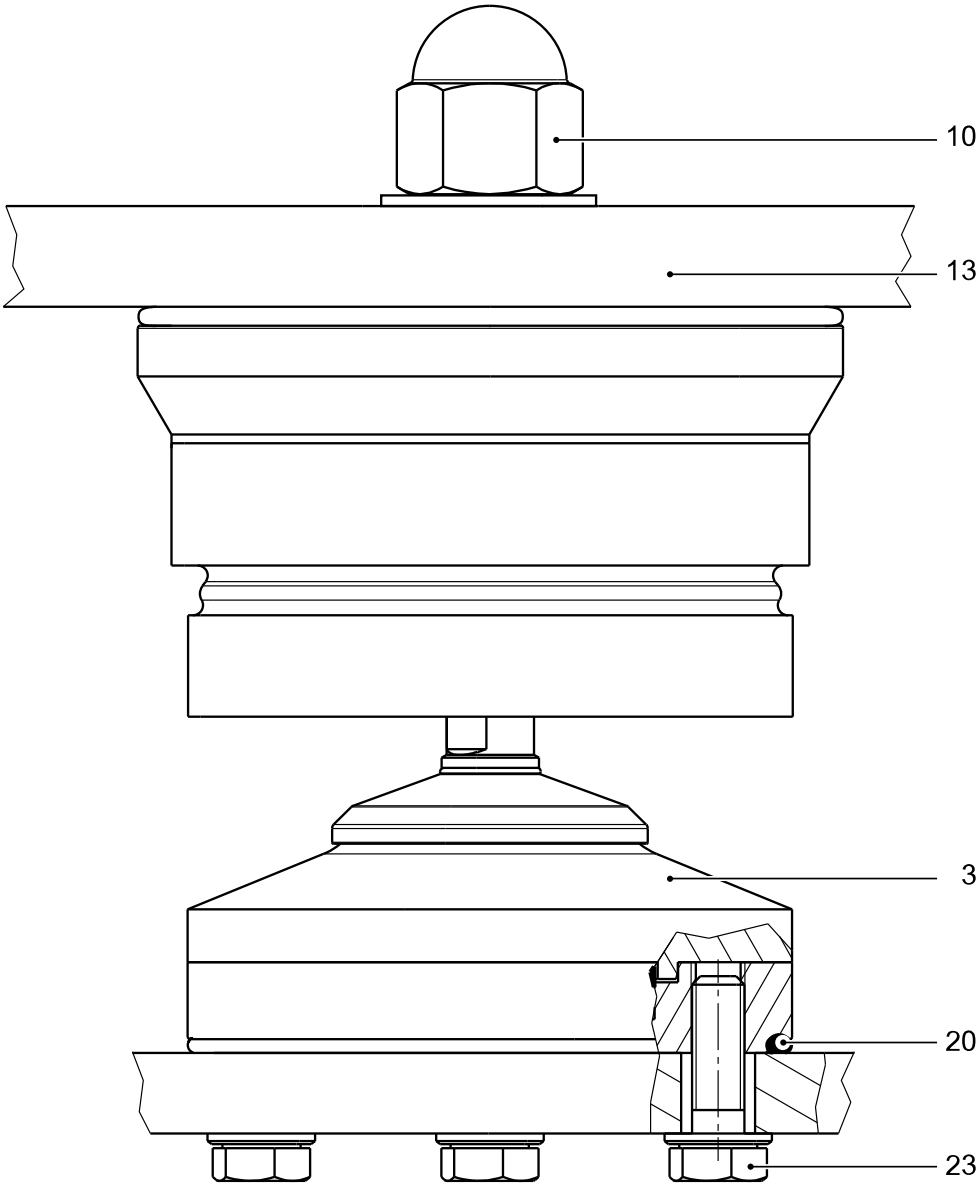
▶ Do not lift or transport load cells by pulling the cable.

Note:

The following section describes how to replace load cells in a weighing system with 3 weighing modules.

Example: Frame mounting

1. Release the load cell cable in the junction box, pull it out carefully and roll it up.

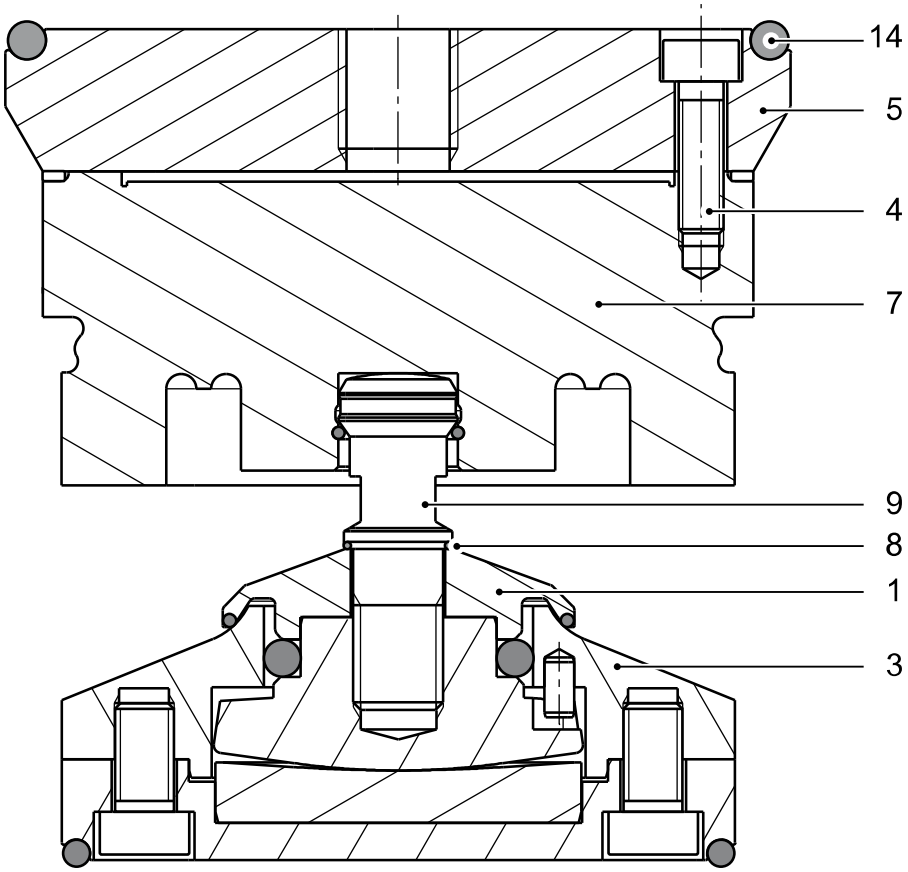


2. Loosen the screws (23) in the pendulum base (3) of the defective weighing module.

Note:

Take care to not lose the O-ring (20)!

3. Use an appropriate lifting tool to carefully lift the weighing object (13) to the position of the defective weighing module.
   ▷ The weighing module is now only connected to the weighing object.
4. Loosen the screw connection (10) in the weighing object (13) carefully and place the weighing module on a stable surface.



5. Loosen the screws (4) in the adapter plate (5); next, remove the adapter plate from the load cell (7).

Note:

Take care to not lose the O-ring (14)!

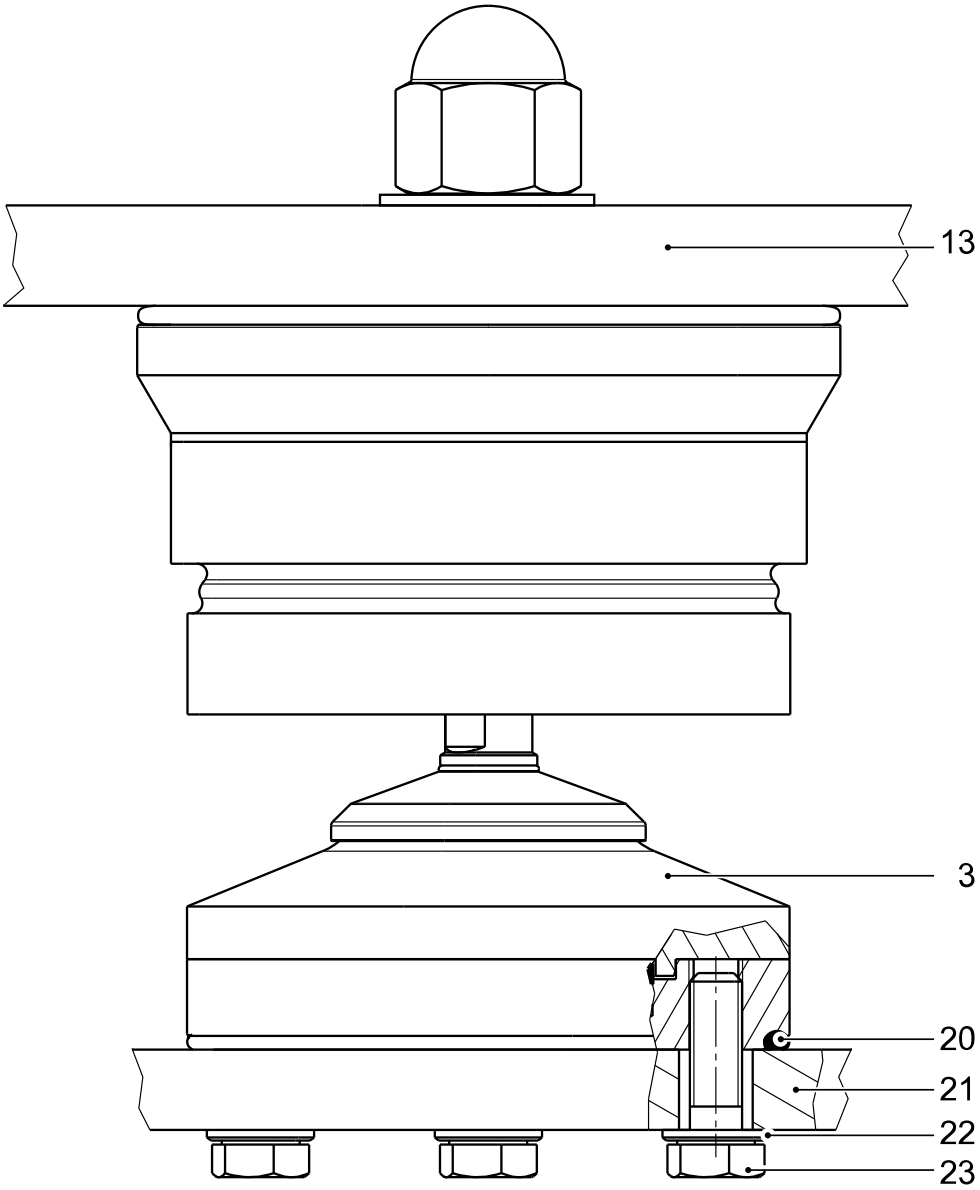
6. Unscrew the pendulum base (3) from the pendulum pin (9) and remove the O-ring (8).

Note:

Take care to not lose the cap (1)!

The blue coating on the thread is a screw-securing adhesive that can be re-used multiple times.

7. Mount the new load cell as described in working steps 5-11 in Chapter 5.3.2 and 1-2 in Chapter 5.3.2.2.



8. Carefully lower the weighing object (13) mounted on the weighing module onto the substructure so that the threaded holes in the pendulum base can be aligned with the holes in the substructure.
9. Insert the O-ring (20) into the groove of the pendulum base (3).
10. From below, screw the pendulum base (3) to the substructure (21) screws (22, washer 4×; 23, screw 4× M8). Always comply with the strength classes and tightening torques of the connector elements (see Chapter 5.2).
11. Remount the load cell cable into the junction box, see Chapter 6.3 or the installation manual relating to the junction box.

9.2 Repairs

The load cell PR 6261 is designed to be as robust as possible for the required measuring accuracy and is highly reliable.

Should an electrical or mechanical defect nevertheless occur, the load cell must be replaced.

Note:

See Chapter 9.1.2.

Load cell repair is not possible.

9.3 Cleaning

The weighing module is easy to clean. It can be spray-washed with water (see IP69 specification).

For this purpose, spray the water jet from top to bottom and around the weighing module.

NOTICE

Some cleaning agents may not be compatible with the weighing module material.

- When using cleaning agents, ensure that their compatibility with the weighing module material has been tested and approved (see Chapter 4.2).

10 Disposal

Our products and their packaging should not be disposed of in municipal waste (e.g. garbage can for recyclable packaging, garbage can for paper packaging, etc.). They can either be recycled by the customer themselves, providing this complies with requirements set out by electrical or electronic waste or packaging waste laws, or sent back to Minebea Intec at a charge.

This option of returning the product is intended to provide proper recycling or reuse in a manner that is collected separately from municipal waste.

Before disposing of or scrapping the old products, any single-use or rechargeable batteries should be removed and taken to a suitable collection point. The type of battery used is specified in the technical data.

Please see our General Terms and Conditions for further information.

Service addresses for repair acceptance and collection points can be found on the product information enclosed with the product as well as on our website (www.minebea-intec.com).

Should you have any further questions, please contact your local service representative or our service center.

Minebea Intec GmbH

Repair center

Meiendorfer Strasse 205 A

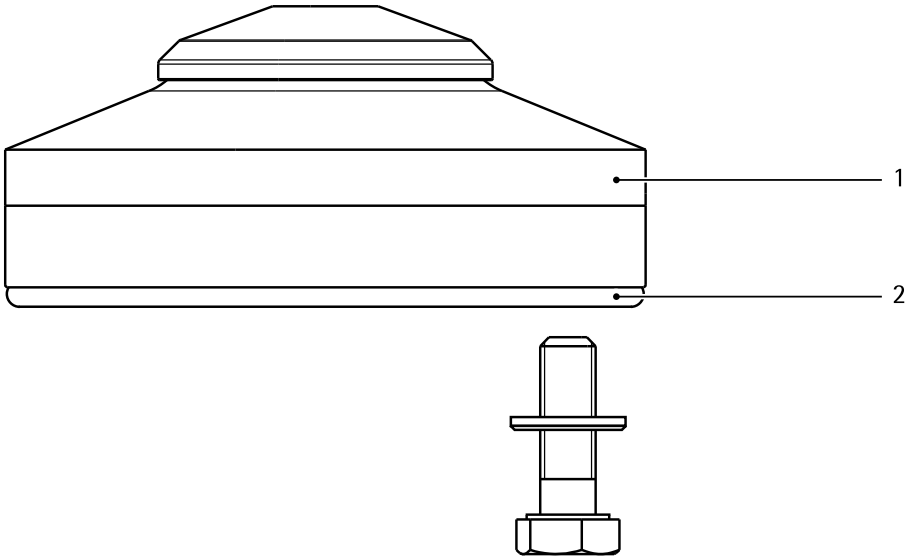
We reserve the right not to accept products that are contaminated with hazardous substances (ABC contamination).

11 Options

11.1 PR 6061/02S pendulum base for frame mounting for Novego®

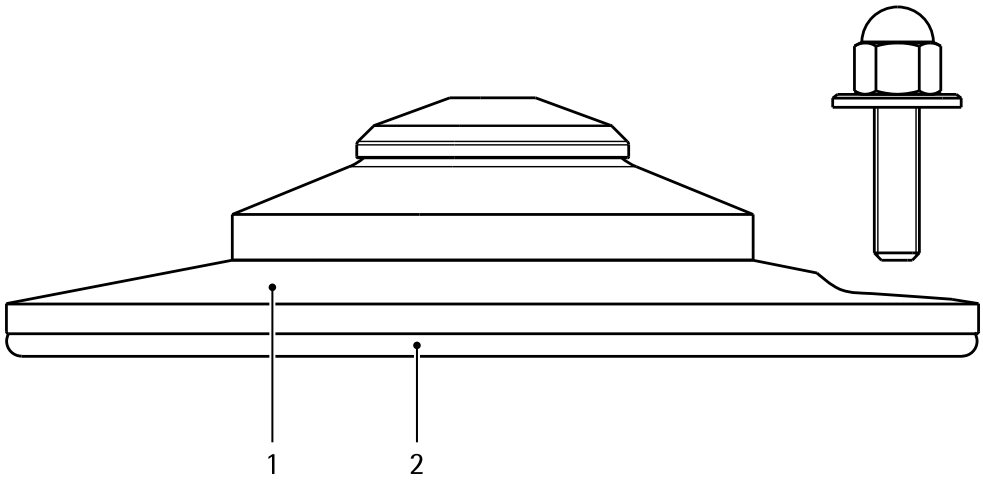
Order no. 9405 360 61022



No.	Identifier
1	Pendulum base
2	O-ring
The following items are not shown:	
3	Drilling template
4	Installation overview
The following fastening material is required for mounting:	
	Washer (4×)
	Screw M8×24(4×)

11.2 PR 6061/03S pendulum base for ground installation for Novego®

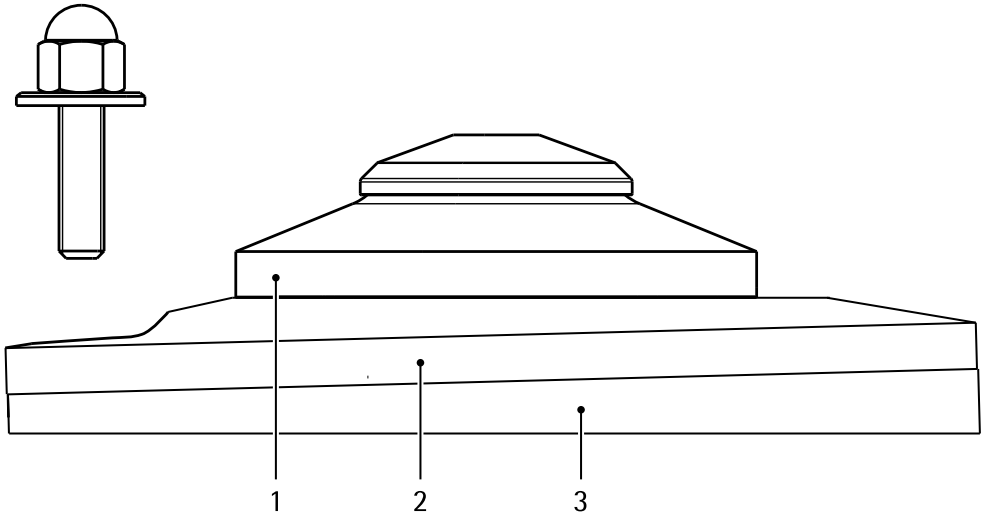
Order no. 9405 360 61032



No.	Identifier
1	Pendulum base
2	O-ring
The following items are not shown:	
3	Drilling template
4	Installation overview
The following fastening material is required for the foundation mounting:	
	Threaded bar M8(3×)
	Cap nut M8 (3×)

11.3 PR 6061/04S pendulum base for ground installation with tilt correction for Novego®

Order no. 9405 360 61042



No.	Identifier
1	Pendulum base, incl. No. 2 + 3
2	upper ground plate
3	lower ground plate
The following items are not shown:	
4	Spirit level
5	drilling and mounting template
6	Installation overview
The following fastening material is required for mounting:	
	Threaded bar M8(3×)
	Cap nut M8 (3×)

12 Replacement parts

No.	Description	Max. capacity	Order no.
1	Threaded bar with cover nut (for PR 6261/00S)		5312 506 98001
2	Pendulum, top	25...50 t	5312 506 98002
3	Threaded bar with cover nut (for PR 6261/05S)		5312 506 98003
4	O-ring kit	125 kg	5312 530 58010
5	O-ring kit	250 kg, 500 kg	5312 530 58011
6	O-ring kit	1 t, 2 t	5312 530 58012
7	Load cell grease 4× 5 g		5312 390 12001
8	Fastening set incl. connector (Connexx modul)		5312 693 98162

13 Accessories

13.1 Connecting cables

To connect the junction box to the weighing electronics, we recommend using the following connecting cables:

No.	Description	Order no.
1	PR 6135/××	9405 361 35××2
2	PR 6135/01A (armored)	9405 361 35019
3	PR 6136/×× (for installation inside the explosion-hazarded area)	9405 361 36××1
4	PR 6136/01A (armored, for installation inside the explosion-hazarded area)	9405 361 36019

13.2 Cable junction boxes

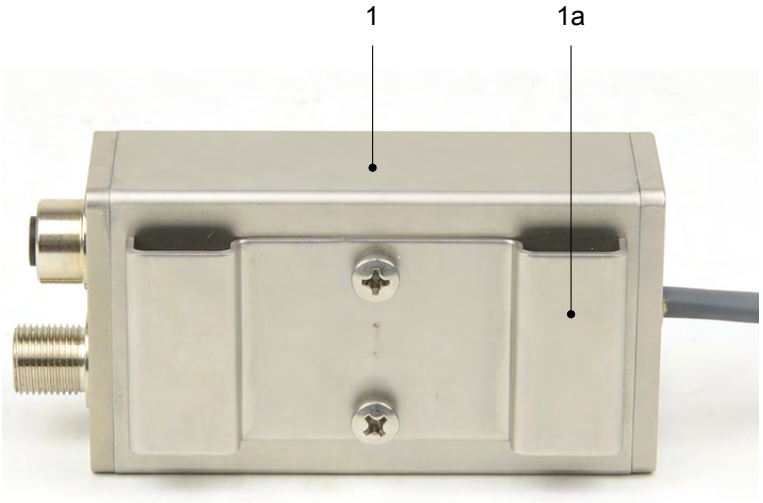
We recommend using the following junction boxes:

No.	Description	Order no.
1	PR 6130/04 (aluminum, 1–4 load cells, IP67)	9405 361 30044
2	PR 6130/08 (polycarbonate, 1–8 load cells, IP66)	9405 361 30084
3	PR 6130/34Sa (1.4301, 1–4 load cells, IP68, IP69, verifiable)	9405 361 30344
4	PR 6130/35S (1.4301, 1–4 load cells, IP68, IP69, verifiable)	9405 361 30354
5	PR 6130/64Sa (1.4301, 1–4 load cells, IP68, IP69, verifiable, ATEX)	9405 361 30644
6	PR 6130/65S (1.4301, 1–4 load cells, IP68, IP69, verifiable, ATEX)	9405 361 30654

13.3 Connexx module

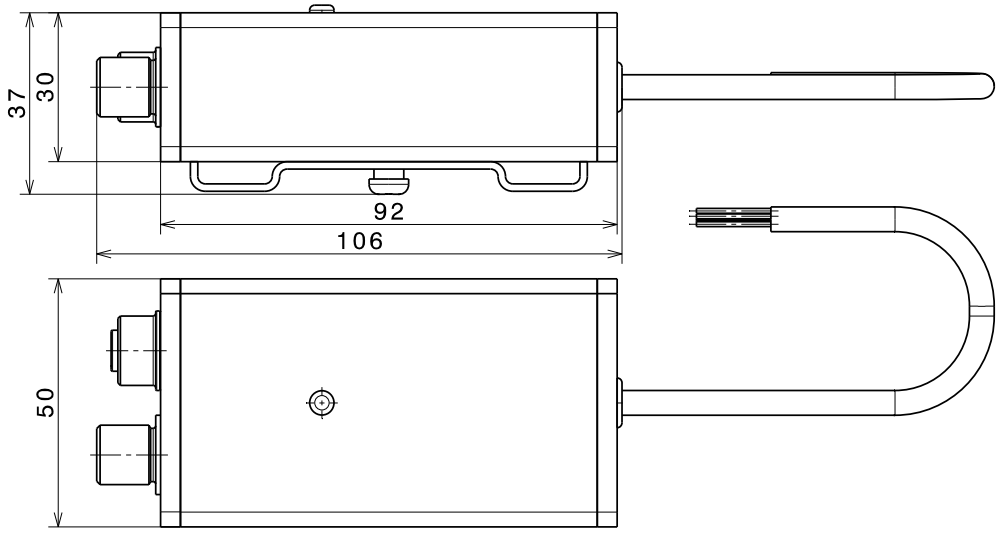
13.3.1 Specifications

13.3.1.1 Equipment supplied



No.	Description
1	Connexx module incl. retaining plate (1a)
Not shown:	
2	Fixing bracket incl. knurled screw
3	Washers (4×; for various screw sizes)
4	Rail holder

13.3.1.2 Dimensions



All dimensions in mm

13.3.1.3 Technical data

Designation	Description	Abbr.	Temperature
Nominal ambient temp. range	to hold the specified performance	B_T	-10...+40 °C
Usable ambient temp. range	permissible for continuous operation without damage	B_{Tu}	-30...+60 °C
Storage temperature range	without electrical and mechanical stress	B_{Ti}	-30...+70 °C

13.3.2 Connection of Connexx modules

The load cell is firmly attached to the Connexx module.

The load cell cable is 0.7...1.0 m long.

The mounting options for the module are described in Chapter 13.3.3.

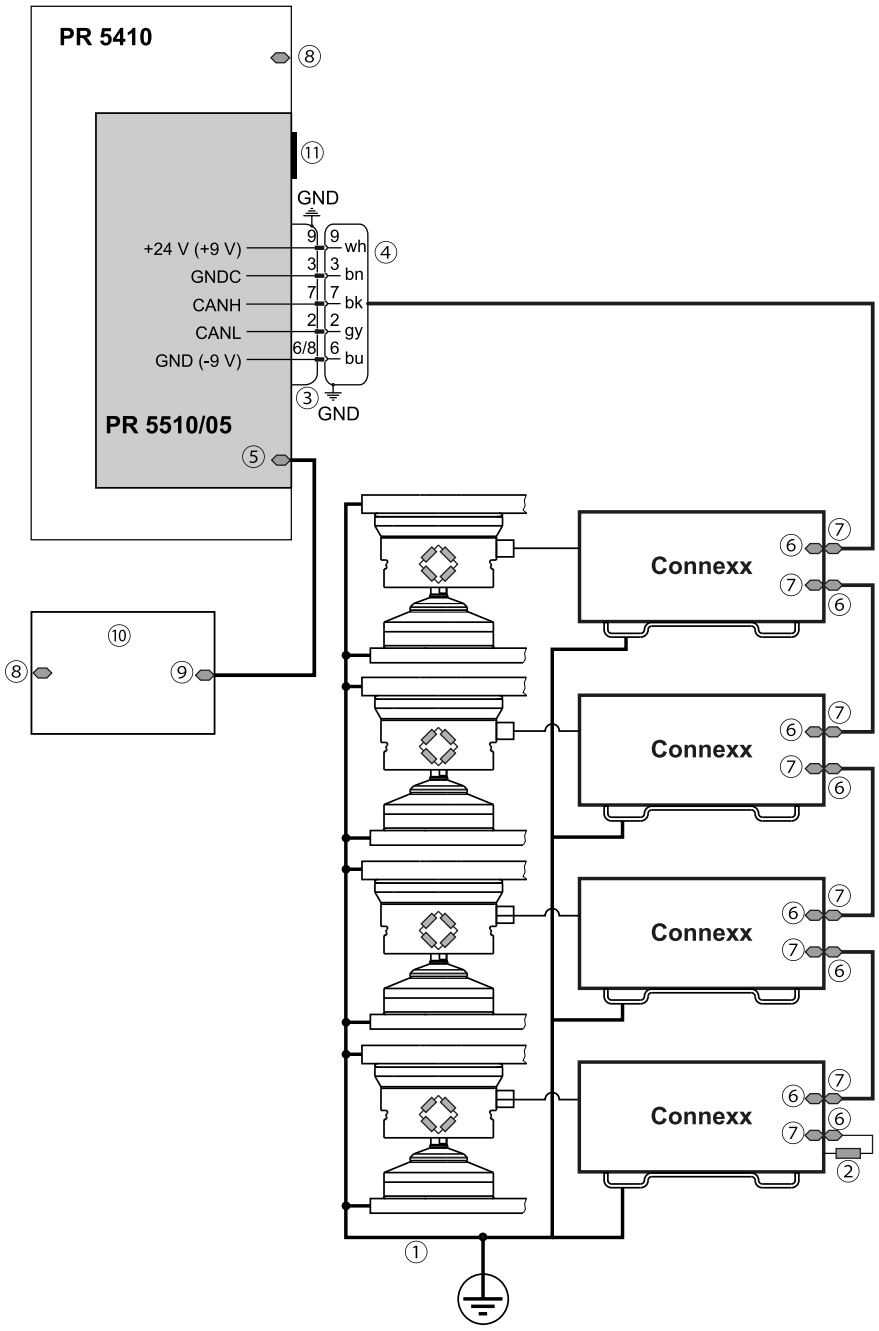
Cable lengths

Connecting part	Recommended length
Between the individual Connexx modules	max. 10 m

Connections

Color abbreviations	Color	Description
wh	white	+ Supply voltage
bu	blue	- Supply voltage
bn	brown	GNDC
gy gr/ye	gray green/yellow	CAN_L bus signal (material PUR) CAN_L bus signal (material PVC)
bk	black	CAN_H bus signal

Connection example, shown as a diagram



①
Potential equalization
②
Terminating resistor
③
D-Sub 9-pin plug connector, male
④
D-Sub 9-pin plug connector, female
⑤
Input voltage U_{DC} = 24 V (only for connected external voltage supply)
⑥
M12 plug connector, male
⑦
M12 plug connector, female
⑧
Voltage supply U_{AC} = 230 V
⑨
Output voltage U_{DC} = 24 V (only for connected external voltage supply)
⑩
External voltage supply (only required when connecting >4 Connexx modules)
⑪
Switch to turn on a bus-terminating resistor

13.3.3 Mounting options

The Connexx module is delivered with mounting elements.

It is possible to mount the Connexx module in the following ways:

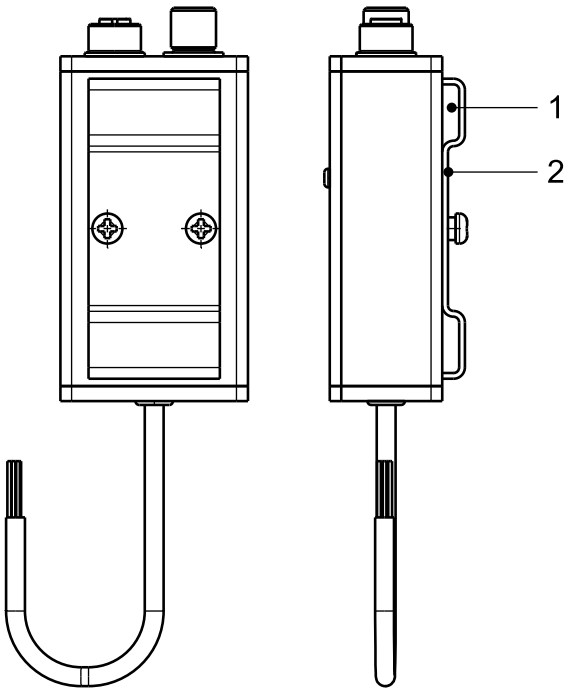
- Mounting using a retaining plate, see Chapter 13.3.3.1
- Mounting using a mounting bracket, see Chapter 13.3.3.2
- Mounting using a mounting rail holder, see Chapter 13.3.3.3

13.3.3.1 Mounting using a retaining plate

When using a retaining plate, the Connexx module is attached to the weighing device (e.g. the leg of a container).

Note:

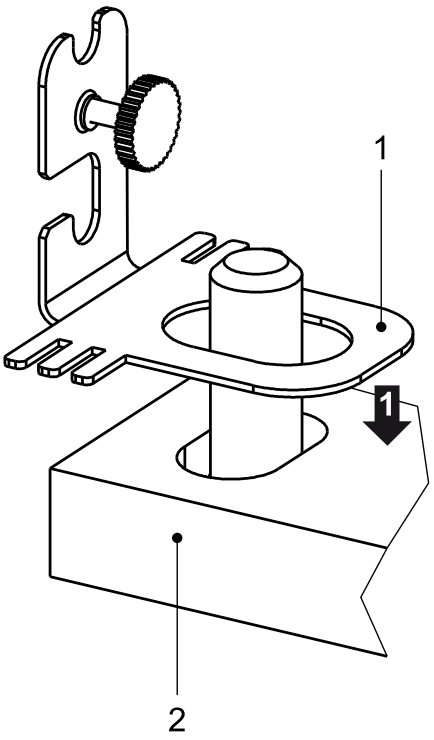
Minebea Intec recommends using a stainless-steel cable tie when mounting using a retaining plate.



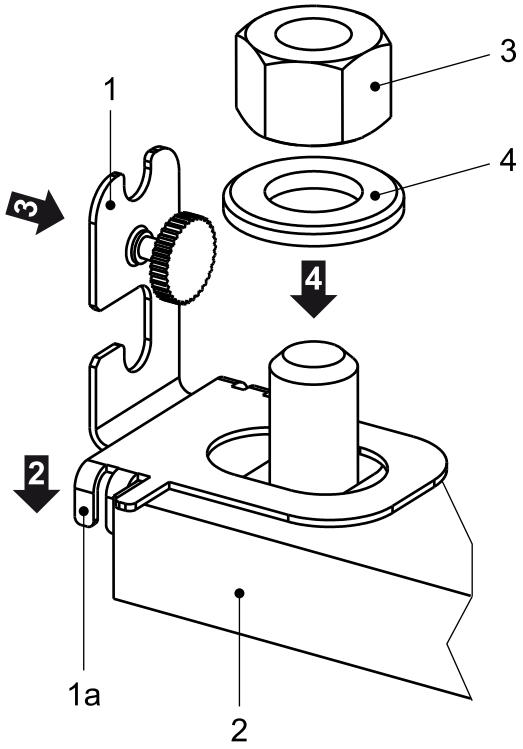
▶ Thread the stainless-steel cable tie through the lugs (1) on the retaining plate (2) and attach to the weighing device.

13.3.3.2 Mounting using a fixing bracket

When using a fixing bracket, the Connexx module is attached to the mounting kit.

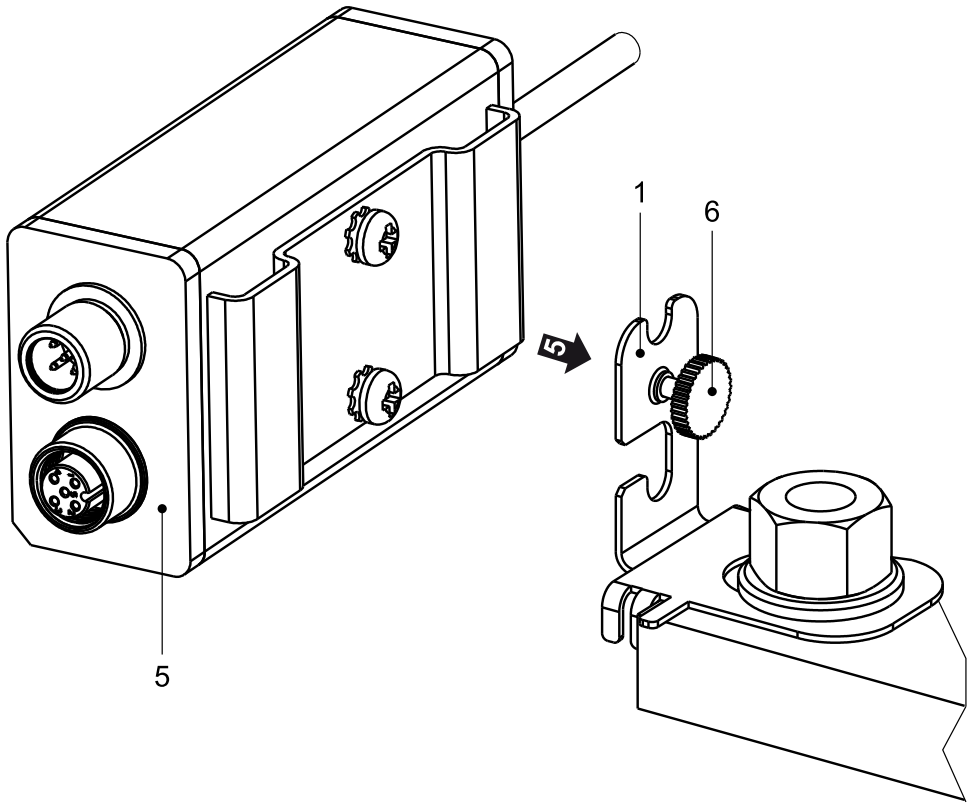


1. Place the fixing bracket (1) on the lower plate (2) of the mounting kit.



2. Depending on the mounting kit, bend the appropriate lugs (1a) downwards using a tool to prevent the fixing bracket from twisting.
3. Slide the fixing bracket (1) onto the lower plate (2) of the mounting kit.
4. Place one of the enclosed washers (4) over the bolt and tighten the nut (3).

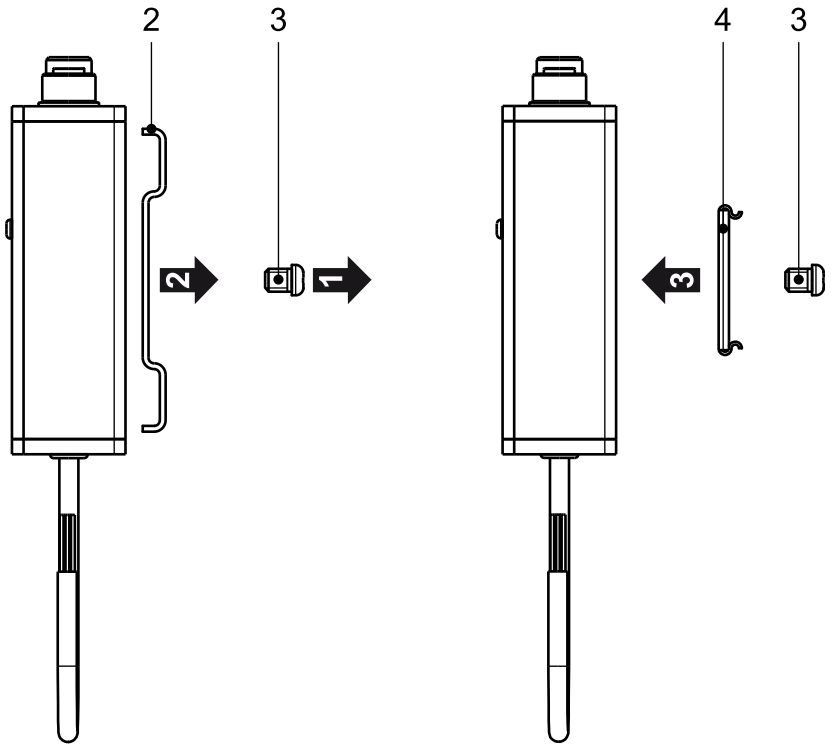
   The fixing bracket is now secured against twisting.



5. Mount the Connexx module (5) on the fixing bracket (1).
6. Tighten the knurled screw (6) by hand to fix the module in place.

13.3.3.3 Mounting using a mounting rail holder

When using a mounting rail holder, the Connexx module is attached to the weighing device (e.g. frame with a mounting rail).



1. Remove the screw (3).
2. Remove the retaining plate (2).
3. Install the rail holder (4) and tighten the screws (3).
4. Click the Connexx Module into the rail holder.

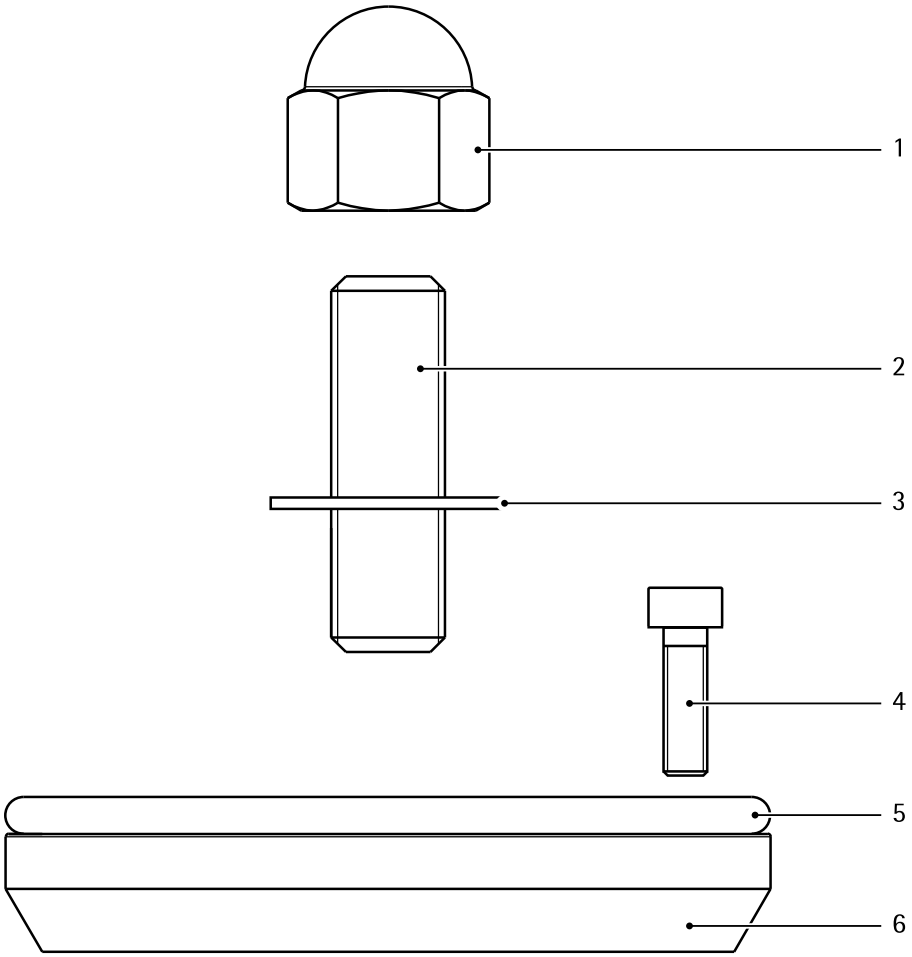
13.3.4 Connecting parts for the Connexx module

To connect the Connexx module, the following connecting parts are required:

No.	Description	Order no.
1	PR 5510/05 CANopen interface for PR 5410	9405 355 10051
2	PR 6154/03 Connexx connecting kit for three load cells (comprising: 2× PR 6155/05, 1× PR 6152/25, 1× PR 6153/99)	9405 361 54031
3	PR 6154/04 Connexx connecting kit for four load cells (comprising: 3× PR 6155/05, 1× PR 6152/25, 1× PR 6153/99)	9405 361 54041
4	PR 6154/06 Connexx connecting kit for six load cells (comprising: 5× PR 6155/10, 1× PR 6152/25, 1× PR 6153/99)	9405 361 54061
5	PR 6154/08 Connexx connecting kit for eight load cells (comprising: 7× PR 6155/10, 1× PR 6152/25, 1× PR 6153/99)	9405 361 54081
6	PR 6155/05 Connecting cable between individual Connexx modules (M12 plug connector, male → M12 plug connector, female); 5 m	9405 361 55051
7	PR 6155/10 Connecting cable between individual Connexx modules (M12 plug connector, male → M12 plug connector, female); 10 m	9405 361 55101
8	PR 6152/10 Connecting cable between Connexx module and CANopen interface (M12 plug connector, female → D-Sub 9-pin plug connector, female); 10 m	9405 361 52101
9	PR 6152/11 Connecting cable between Connexx module and CANopen interface (M12 female → open cable ends incl. D-Sub 9-pin plug connector, female with screw connectors); 10 m	9405 361 52111
10	PR 6152/25 Connecting cable between Connexx module and CANopen interface (M12 plug connector, female → D-Sub 9-pin plug connector, female); 25 m	9405 361 52251
11	PR 6152/26 Connecting cable between Connexx module and CANopen interface (M12 plug connector, female → open cable ends incl. D-Sub 9-pin plug connector, female with screw connectors); 25 m	9405 361 52261
12	PR 6152/40 Connecting cable between Connexx module and CANopen interface (M12 plug connector, female → D-Sub 9-pin plug connector, female); 40 m	9405 361 52401
13	PR 6152/41 Connecting cable between Connexx module and CANopen interface (M12 plug connector, female → open cable ends incl. D-Sub 9-pin plug connector, female with screw connectors); 40 m	9405 361 52411
14	PR 6153/98 Split cable gland for connecting cable PR 6152/.. with D-Sub plug connector, female	9405 361 53981
15	PR 6153/ 99 Terminating resistor for Connexx module (M12 plug connector, male)	9405 361 53991

13.4 PR 6061/00S Adapter plate for Novego®

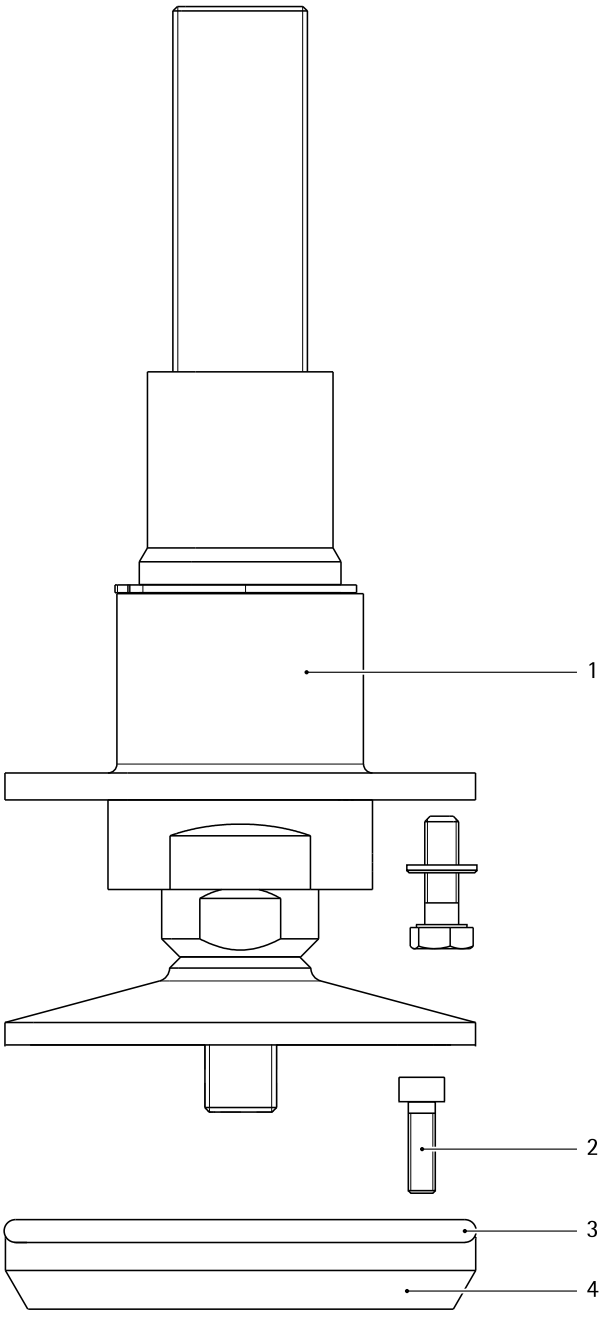
Order no. 9405 360 61002



No.	Identifier
1	Cap nut M16
2	Set screw with M16×45 hexagon socket
3	Washer
4	Screw M6×24(5×)
5	O-ring
6	Adapter plate
7	Drilling template (not shown)

13.5 PR 6061/01S adapter plate with height adjustment for Novego®

Order no. 9405 360 61012

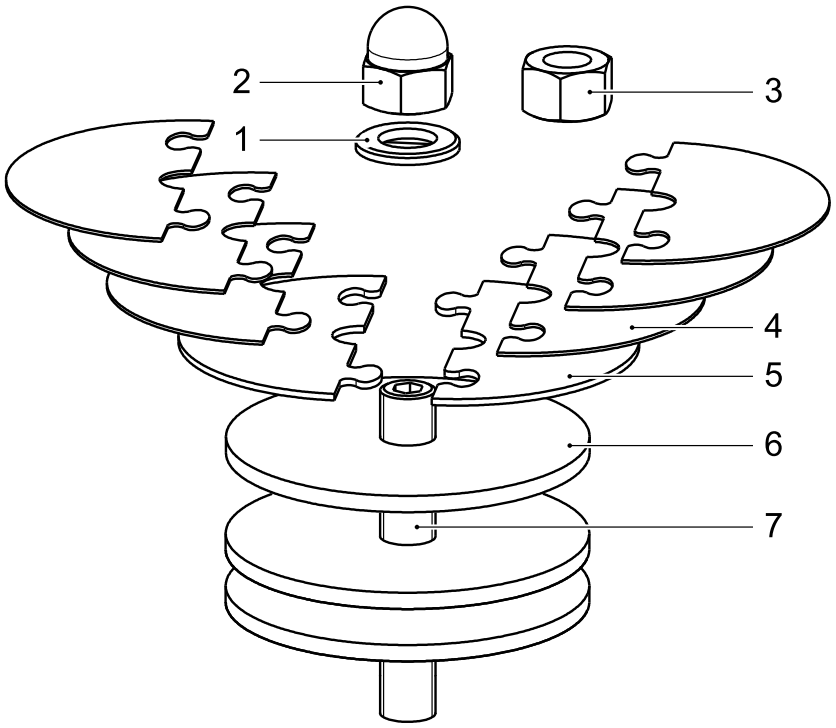


No.	Identifier
1	Height adjustable
2	Screw M6×24 (5×)
3	O-ring
4	Adapter plate
The following items are not shown:	
5	Drilling template

No.	Identifier
6	Installation overview
The following fastening material is required for mounting:	
	Washer (3×)
	Screw M8 (3×)

13.6 PR 6061/05S Set of metal sheets for Novego®

Order no. 9405 360 61052



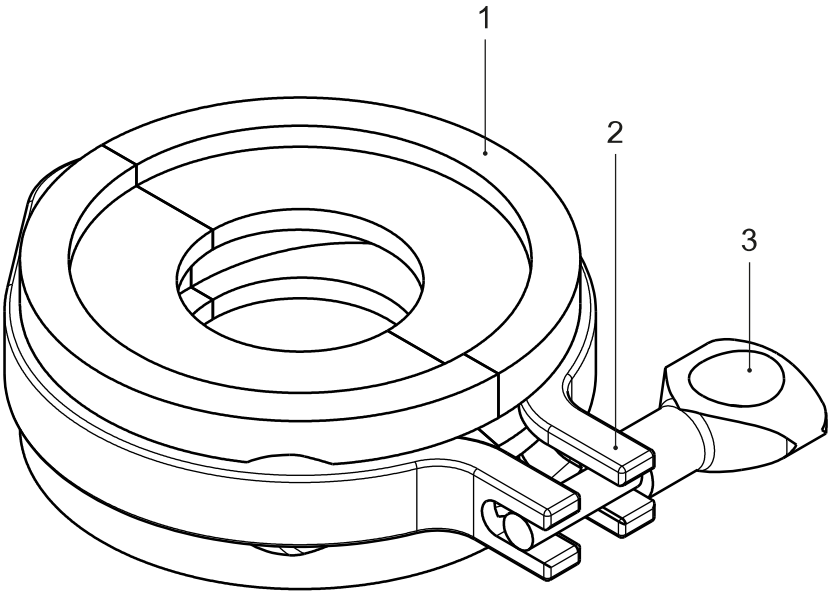
No.	Identifier
1	Washer
2	Cap nut M16
3	Nut M16
4	Balance plate 1 mm, 2-parts (3×)
5	Balance plate 2 mm, 2-parts
6	Balance plate 5 mm (3×)
7	Threaded pin M16×70 with coating
8	Additional information 9499 059 60601 (not shown)

Note:

Compliance with additional instructions 9499 059 60601 is mandatory!

13.7 PR 6061/06S Transportation and installation kit for Novego®

Order code 9405 360 61062



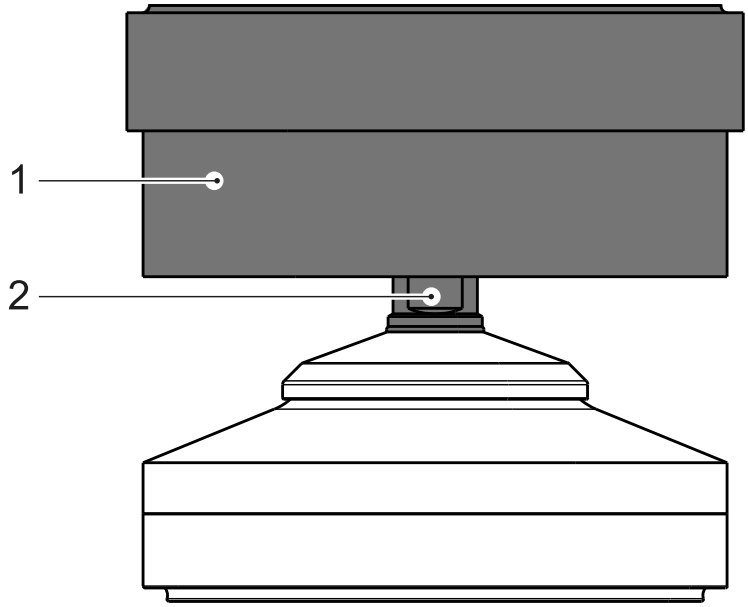
Pos.	Description
1	Half-shell set (including screws, washers, and nuts)
2	Clamping ring
3	Screw
4	Additional information 9499 059 60701 (not pictured)

Note:

Please take note of the additional information 9499 059 60701

13.8 PR 6061/07S Pivot for Novego®

Order code 9405 360 61072



No.	Description
1	Pivot
2	Pendulum pin with O-ring
The following items are not shown:	
3	Gasket
4	O-ring
5	Additional information 9499 059 60801

Note:

Please take note of the additional information 9499 059 60801

(7) Die Bauart dieses Gerätes sowie die verschiedenen zulässigen Ausführungen sind in der Anlage zu dieser Baumusterprüfbescheinigung festgelegt.

(8) Die Zertifizierungsstelle der DEKRA EXAM GmbH, benannte Stelle Nr. 0158 gemäß Artikel 9 der Richtlinie 94/9/EG des Europäischen Parlaments und des Rates vom 23. März 1994, bescheinigt, dass das Gerät die grundlegenden Sicherheits- und Gesundheitsanforderungen für die Konzeption und den Bau von Geräten und Schutzsystemen zur bestimmungsgemäßen Verwendung in explosionsgefährdeten Bereichen gemäß Anhang II der Richtlinie erfüllt. Die Ergebnisse der Prüfung sind in dem Prüfprotokoll BVS PP 16.2012 EG niedergelegt.

(9) Die grundlegenden Sicherheits- und Gesundheitsanforderungen werden erfüllt durch Übereinstimmung mit

EN 60079-0:2012 + A11:2013 Allgemeine Anforderungen
EN 60079-11:2012 Eigensicherheit „i"

(10) Falls das Zeichen „X" hinter der Bescheinigungsnummer steht, wird in der Anlage zu dieser Bescheinigung auf besondere Bedingungen für die sichere Anwendung des Gerätes hingewiesen.

(11) Diese EG-Baumusterprüfbescheinigung bezieht sich nur auf die Konzeption und die Baumusterprüfung des beschriebenen Gerätes in Übereinstimmung mit der Richtlinie 94/9/EG. Für Herstellung und Inverkehrbringen des Gerätes sind weitere Anforderungen der Richtlinie zu erfüllen, die nicht durch diese Bescheinigung abgedeckt sind.

(12) Die Kennzeichnung des Gerätes muss die folgenden Angaben enthalten:

II 1G Ex ia IIC T6 Ga

Wägezelle Typ PR62 | * | * | / | * | * | E |

Unterschiedliche Ausführungen (01, 02, 11, 12, 21, 41, 46, 51, 61), die sich elektrisch und / oder mechanisch unterscheiden

Laststufe (nicht Ex-relevant, nur für Informationszwecke)

15.2 Beschreibung

Die Wägezellen dienen zur Umwandlung von Kraft in ein elektrisches Signal.
Die Zellen haben ein Metallgehäuse mit eingebauten Dehnungsmessstreifen.
Der elektrische Anschluss erfolgt über eine fest angeschlossene Leitung.
Die Zellen sind „einfache elektrische Betriebsmittel".

15.3 Kenngrößen

(15) Beschreibung des Produktes

Die Wägezellen Typen PR62../... und MP76/... gemäß der unten aufgeführten Tabelle dienen zur Messung von Kräften mittels einer DMS Brücke mit Kompensations- und Abgleichwiderständen.
Die Gehäuse der Wägezellen sowie die eingesetzten Membranen bestehen aus Edelstahl. Alle Gehäuseteile und die Membranen sind gasdicht verschweißt.
Die Wägezellen dürfen in durch Staub explosionsgefährdeten Bereichen für EPL Da-Betriebsmittel bzw. EPL Db-Betriebsmittel installiert werden.

Der zulässige Umgebungstemperaturbereich beträgt -20 °C ... 55°C.

(13) **SCHEDULE**

(14) **EU-Type Examination Certificate No. TÜV 03 ATEX 2301 X issue 00**

(15) Description of product

The load cells type PR62../... and MP76/... according to the table mentioned below are used for measuring forces by means of a strain gauge with resistors for compensation and adjustment.
The housings of the load cells as well as the used membranes consist of stainless steel. All parts of the housing and the membranes are welded gas-tight.
The load cells are allowed to be installed in explosion hazardous areas caused by dust for EPL Da apparatus resp. for EPL Db apparatus.
The permissible ambient temperature range is -20 °C ... 55 °C.

Listing of types and shape of housings

Types	Shape of housing

page 2/3

Schedule to EU-Type Examination Certificate No. TÜV 03 ATEX 2301 X issue 00

(17) Specific Conditions for Use

1. The free cable ends of the connections have to be wired outside of the explosion hazardous area or in a suitable terminal box, suitably certified for the application in explosion hazardous areas caused by dust.

2. The connection of non-intrinsically safe circuits
- with a safe limitation of the available power of 2 W and
- a safe galvanic separation from earth potential (necessary for load cells without an additional earth connection)
to the load cells of EPL Db is permissible.

3. The load cells have to be installed in such a way, that the housings are safely connected with earth potential (e. g. via the earth terminal; observe manual of the manufacturer).

Diese Erklärung bescheinigt die Übereinstimmung mit den genannten EU-Richtlinien, ist jedoch keine Zusicherung von Eigenschaften. Bei einer mit uns nicht abgestimmten Änderung des Produktes verliert diese Erklärung ihre Gültigkeit. Die Sicherheitshinweise der zugehörigen Produktdokumentation sind zu beachten.
This declaration certifies conformity with the above mentioned EC Directives, but does not guarantee product attributes. Unauthorized product modifications make this declaration invalid. The safety information in the associated product documentation must be observed.

CERTIFICATE OF CONFORMITY

1. HAZARDOUS LOCATION ELECTRICAL EQUIPMENT PER CANADIAN REQUIREMENTS
2. Certificate No: FM17CA0138
3. Equipment: (Type Reference and Name) Model PR 6201, PR 6202, PR 6203, PR 6211, PR 6212, PR 6221, PR 6241, PR 6246, PR 6251, PR 6261 Load Cells
4. Name of Listing Company: Minebea Intec GmbH
5. Address of Listing Company: Meiendorfer Str. 205A
22145 Hamburg
Germany
6. The examination and test results are recorded in confidential report number:

   3053046 dated 22nd July 2014
7. FM Approvals LLC, certifies that the equipment described has been found to comply with the following Approval standards and other documents:

   CAN/CSA-C22.2 No. 213: 2013, CAN-C22.2 No. 157-92: 2012,
CSA-C22.2 No. 1010.1: 2004, CAN/CSA-C22.2 No. 25: 2009
8. If the sign 'X' is placed after the certificate number, it indicates that the equipment is subject to specific conditions of use specified in the schedule to this certificate.
9. This certificate relates to the design, examination and testing of the products specified herein. The FM Approvals surveillance audit program has further determined that the manufacturing processes and quality control procedures in place are satisfactory to manufacture the product as examined, tested and Approved.
10. Equipment Ratings:

    Intrinsically safe (Entity) for use in Class I,II and III Division 1, Groups A, B, C, D, E, F and G indoor and outdoor Hazardous Locations, Temperature Class T4A Ta= -40°C to +70°C and T5 Ta= -40°C to +55°C when installed per Control Drawing 4012 101 5688.
    Nonincendive (NIFW) for use in Class I, Division 2, Groups A, B, C, and D indoor and outdoor Hazardous Locations, Temperature Class T4A Ta= -40°C to +70°C and T5 Ta= -40°C to +55°C when installed per Control Drawing 4012 101 5688.

SCHEDULE

Canadian Certificate Of Conformity No: FM17CA0138

Dust Ignition protected for Class II, III Division 2, Groups E, F and G indoor and outdoor Hazardous Locations, Temperature Class T4A Ta= -40°C to +70°C and T5 Ta= -40°C to +55°C when installed per Control Drawing 4012 101 5688

11. The marking of the equipment shall include:

IS CL I, II, III, DIV 1, GP A,B,C,D,E,F,G Entity - 4012 101 5688
NI CL I, II, III, DIV 2, GP A,B,C,D, E, F, G - 4012 101 5688; NIFW
T4A Ta= -40°C to 70°C; T5 Ta= -40°C to 55°C

12. **Description of Equipment:**

General - The Model PR 62xx Series Load Cells are precision compression load cells designed to meet the specific requirements of a wide range of weighing installations.

Construction - The Model PR 62xx Series Load Cells are contructed of welded stainless steel, hermetically sealed, and filled with inert gas.

Ratings - The Model PR 62xx Series Load Cells are rated for an operating temperature range of -40°C to 70°C. Entity and Nonincendive Field Wiring parameters are as defined below.

PR 62a/bc d e. Load Cell.

Entity/Nonincendive Field Wiring Parameters:
Ui = 25 V, Ii = 160 mA, Pi = 2 W; Ci= 0 µF, Li= 0 mH.

a = 01, 02, 03, 11, 12, 21, 41, 46, 51, 61
b = up to three numbers denoting the maximum capacity (may be separated by a dot)
c = Unit of measurement: blank or t
d = Accuracy: up to three numbers or letters (may be separated by dots)
e = Special: F or blank

13. **Specific Conditions of Use:**

None

14. **Test and Assessment Procedure and Conditions:**

This Certificate has been issued in accordance with FM Approvals Canadian Certification Scheme.

15. **Schedule Drawings**

A copy of the technical documentation has been kept by FM Approvals.

16. **Certificate History**

Details of the supplements to this certificate are described below:

Vastavusdeklaratsioon
1. Tootemudel / tootenumber / kehtib vaid järgmise projekti puhul:
2. Tootja nimi ja aadress (2.1) ning tema volitatud esindaja (2.2):
3. Käesolev vastavusdeklaratsioon on välja antud tootja ainuvastutusel.
4. Deklareeritav toode:
5. Ülaltkirjeldatud deklareeritav toode on kooskõlas asjaomaste liidu ühtlustamisaktidega:
6. Viited kasutatud harmoneeritud standarditele või viited muudele tehnilistele spetsifikatsioonidele, millele vastavust deklareeritakse:
7. Teavitatud asutus w teostas x ja andis välja tõendi z, mis on sätkohane y-le:
A. Lisateave järgmise kohta ( ):
A.1 Märgistus
A.2 Märgistus
A.3 Märgistus
A.4 Ülalnimetatud toode on kooskõlas direktiivi 2014/34/EL nõuetega. Üks või mitu nimetatud Euroopa standardit on asendatud juba uute väljaannetega. Tootja kinnitab, et toode on kooskõlas ka nende uute väljaannetega, kuna uute standardite muudetud nõuded ei mõjuta toodet.

Déclaration de conformité
1. Modèle / numéro de produit / valable uniquement pour le numéro de projet:
2. Nom et adresse du fabricant (2.1) et de son mandataire (2.2):
3. La présente déclaration de conformité est établie sous la seule responsabilité du fabricant.
4. Objet(s) de la déclaration :
5. Le ou les objets de la déclaration décrits ci-dessus est/sont conforme(s) à la législation d'harmonisation de l'Union applicable :
6. Références des normes harmonisées pertinentes appliquées ou des autres spécifications techniques par rapport auxquelles la conformité est déclarée :
7. L'organisme notifié w a effectué x et a établi l'attestation y applicable à z :
A. Informations complémentaires relatives à ( ) :
A.1 Marquage
A.2 Marquage
A.3 Marquage
A.4 Le produit susmentionné est conforme aux exigences de la directive 2014/34/UE. Une ou plusieurs des normes européennes mentionnées ont déjà été remplacées par de nouvelles éditions. Le fabricant déclare que le produit est également conforme à ces nouvelles éditions, dans la mesure où les exigences modifiées des nouvelles normes n'affectent pas le produit.

hrvatski (hr)

Izjava o sukladnosti
1. Model proizvoda / broj proizvoda / vrijedi samo za broj projekta:
2. Naziv i adresa proizvođača (2.1) i njegovog ovlaštenog zastupnika (2.2):
3. Za izdavanje ove izjave o sukladnosti odgovoran je isključivo proizvođač.
4. Predmet(i) izjave:
5. Predmet(i) navedene izjave je/su u skladu s mjerodavnim zakonodavstvom Unije o usklađivanju:
6. Pozivanja na relevantne primijenjene usklađene norme ili pozivanja na ostale tehničke specifikacije u vezi s kojima se izjavljuje sukladnost:
7. Prijavljeno tijelo w provelo je x i izdalo certifikat y koji je relevantan za z:
A. Dodatne informacije o proizvodu ( ):
A.1 Označavanje
A.2 Označavanje
A.3 Označavanje
A.4 Prethodno navedeni proizvod u skladu je sa zahtjevima Direktive 2014/34/EU. Jedna ili više navedenih europskih normi već je zamijenjeno novim izdanjima. Proizvođač izjavljuje da je proizvod u skladu i s tim novim izdanjima, jer se izmijenjeni zahtjevi tih novih normi ne odnose na proizvod.

magyar (hu)

Megfelelőségi nyilatkozat
1. Termékmodell / termékszám / kizárólag az alábbi projektszámhoz érvényes:
2. A gyártó (2.1) vagy adott esetben meghatalmazott képviselőjének (2.2) neve és címe:
3. Ezt a megfelelőségi nyilatkozatot a gyártó kizárólagos felelőssége mellett adják ki.
4. A nyilatkozat tárgya(i):
5. A fent ismertetett nyilatkozat tárgya megfelel a vonatkozó uniós harmonizációs jogszabályoknak:
6. Az alkalmazott harmonizált szabványokra való hivatkozás vagy az azokra az egyéb műszaki leírásokra való hivatkozás, amelyekkel kapcsolatban megfelelőségi nyilatkozatot tettek:
7. A(z) w bejelentett szervezet elvégezte a(z) x eljárást, és kiállította a(z) z kapcsolódó y tanúsítványát:
A. További információk ( ):
A.1 Jelölés
A.2 Jelölés
A.3 Jelölés
A.4 A fentebb megnevezett termék megfelel a 2014/34/EU irányelvben foglalt követelményeknek. Egy vagy több említett Európai szabvány a kiállítás óta frissült. A gyártó kijelenti, hogy a termék megfelel a szabványok legújabb kiadásában foglalt követelményeknek, mivel a szabvány módosításai nem érintik az adott terméket.

italiano (it)

Dichiarazione di conformità
1. Modello di prodotto / numero di prodotto / valido unicamente per numero di progetto:
2. Nome e indirizzo del fabbricante (2.1) e del relativo rappresentante autorizzato (2.2):
3. La presente dichiarazione di conformità è rilasciata sotto la responsabilità esclusiva del fabbricante.
4. Oggetto/i della dichiarazione:
5. L'oggetto o gli oggetti della dichiarazione di cui sopra sono conformi alla pertinente normativa di armonizzazione dell'Unione:
6. Riferimento alle pertinenti norme armonizzate utilizzate o riferimenti alle altre specifiche tecniche in relazione alle quali è dichiarata la conformità:
7. L'organismo notificato w ha effettuato x e rilasciato il certificato y pertinente a z:
A. Informazioni aggiuntive su ( ):
A.1 Marcatura
A.2 Marcatura
A.3 Marcatura
A.4 Il prodotto menzionato in precedenza è conforme alle prescrizioni della direttiva 2014/34/UE. Una o più norme UE menzionate sono già state sostituite da nuove versioni. Il fabbricante dichiara che il prodotto è conforme anche alle nuove versioni in quanto le prescrizioni modificate delle nuove norme non interessano il prodotto.

ПРИЛОЖЕНИЕ

К СЕРТИФИКАТУ СООТВЕТСТВИЯ № ТС RU C-DE.МЮ62.B.05836

Серия RU № 0472416

1. Назначение и область применения

Сертификат соответствия распространяется на датчики нагрузки моделей PR 6201, PR 6212, PR 6261, предназначенные для взвешивания бункеров, резервуаров и технологических емкостей.

Область применения - взрывоопасные зоны классов 0, 1, 2 по ГОСТ IEC 60079-10-1-2011 категорий взрывоопасных смесей IIA, IIB, IIC по ГОСТ Р МЭК 60079-20-1-2011, а также среды, содержащие взрывоопасную пыль подгрупп IIIA, IIIB, IIIC согласно маркировкам взрывозащиты.

2. Описание оборудования и средств обеспечения взрывозащиты

Датчики нагрузки моделей PR 6201, PR 6212, PR 6261 выполнены в цилиндрическом стальном корпусе со степенью защиты от внешних воздействий IP68 или IP69 в зависимости от исполнения. Устройства содержат мембрану и тензодатчик сопротивления, преобразующие механическую деформацию, возникающую при нагрузке датчика, в электрический сигнал.

Подключение датчиков осуществляется с помощью постоянно присоединенного кабеля из термопласта TPE.

Подробное описание конструкции датчиков приведено в руководствах по эксплуатации.

Основные технические данные:

Маркировка взрывозащиты ..... 0Ex ia IIC T6
2Ex nA IIC T6 X
Ex tc IIC T85°C X
Ex ta IIC T160°C X

Диапазон температур окружающей среды, °C ..... от -52 до +55

Степень защиты от внешних воздействий по ГОСТ 14254-2015 ..... IP68, IP69

Максимальное напряжение питания, В 25

Максимальная входная мощность, Вт 2

Параметры искробезопасных цепей приведены в таблице 2.1:

Таблица 2.1

Наименование	Значение
Максимальное входное напряжение U_i, В	25
Максимальный входной ток I_i, мА	160
Максимальная входная мощность P_i, Вт	2
Максимальная внутренняя емкость C_i, мкФ	0
Максимальная внутренняя индуктивность L_i, мГн	0

Взрывозащищенность датчиков обеспечивается выполнением их конструкции в соответствии с общими требованиями по ГОСТ 31610.0-2012, видом взрывозащиты «искробезопасная электрическая цепь «i» по ГОСТ 31610.11-2012, видом защиты «n» по ГОСТ 31610.15-2012 и видом взрывозащиты от воспламенения пыли «t» по ГОСТ Р МЭК 60079-31-2010.

Внесение изготовителем в конструкцию и техническую документацию изменений, влияющих на взрывобезопасность и соответствие газоанализаторов требованиям ТР ТС 012/2011, возможно только по согласованию с органом по сертификации ООО «ПРОММАШ ТЕСТ».

Данный сертификат соответствия подтверждает соответствие требованиям взрывобезопасности ТР ТС 012/2011 и не рассматривает любые другие виды безопасности газоанализаторов.

3. Оборудование соответствует требованиям:

ТР ТС 012/2011	Технический регламент Таможенного союза «О безопасности оборудования для работы во взрывоопасных средах»;
ГОСТ 31610.0-2012	Электрооборудование для взрывоопасных газовых сред. Часть 0. Общие требования;
ГОСТ 31610.11-2012	Электрооборудование для взрывоопасных газовых сред. Часть 11. Искробезопасная электрическая цепь «i»;
ГОСТ 31610.15-2012	Электрооборудование для взрывоопасных газовых сред. Часть 15. Конструкция, испытания и маркировка электрооборудования с видом защиты «n»;
ГОСТ Р МЭК 60079-31-2010	Взрывоопасные среды. Часть 31. Оборудование с видом взрывозащиты от воспламенения пыли «t».

4. Маркировка

Маркировка, наносимая на электрооборудование, должна включать следующие данные:

4.1 наименование предприятия-изготовителя или его зарегистрированный товарный знак;
4.2 обозначение типа оборудования;
4.3 порядковый номер по системе нумерации предприятия-изготовителя;
4.4 маркировку взрывозащиты см. п. 2 «Основные технические данные»;
4.5 наименование или знак органа по сертификации и номер сертификата соответствия;
4.6 предупредительные надписи;
4.7 единый знак ЕАС обращения продукции на рынке государств - членов Таможенного союза;
4.8 специальный знак взрывобезопасности Ex в соответствии с ТР ТС 012/2011;
4.9 Другие данные, которые должен отразить изготовитель, если это требуется технической документацией (диапазон температур окружающей среды, степень защиты оболочки и т.д.).

5. Специальные условия применения

Знак X, стоящий после Ex-маркировки, означает, что при эксплуатации необходимо соблюдать следующие специальные условия:
- для подключения гибкого вывода датчиков во взрывоопасной зоне должны применяться сертифицированные взрывозащищенные коробки;
- электрические параметры питания датчиков не должны превышать значений, приведенных в разделе 2;
- для оборудования предназначенного для установки во взрывоопасные пылевые зоны необходимо применять меры, препятствующие накоплению электростатического заряда.

АКТ

испытаний в целях утверждения типа датчиков весоизмерительных PR 6261, представленных фирмой «Minebea Intec GmbH», Германия

1. ФГУП «ВНИИМ им. Д.И. Менделеева» провел испытания в целях утверждения типа датчиков весоизмерительных PR 6261, изготовленных фирмой «Minebea Intec GmbH», Германия.

Испытания проведены в период с 11.09.2017 г. по 15.11.2017 г. на основании заявки фирмы «Minebea Intec GmbH», Германия, исх. № б/н от 22.08.2017 г.

Испытания проводились ФГУП «ВНИИМ им. Д.И. Менделеева», г. Санкт-Петербург.

2. ФГУП «ВНИИМ им. Д.И. Менделеева» были представлены два образца датчиков весоизмерительных PR 6261/500kg C3 (зав. № 3035659015) и PR 6261/2t C3 (зав. № 3035658751).

3. ФГУП «ВНИИМ им. Д.И. Менделеева» провел испытания датчиков весоизмерительных PR 6261 в соответствии с программой испытаний «Датчики весоизмерительные PR 6261. Программа испытаний в целях утверждения типа», утвержденной ФГУП «ВНИИМ им. Д.И. Менделеева» 11.09.2017 г.

4. Результаты испытаний положительные.

5. В результате проведенных испытаний для датчиков весоизмерительных PR 6261:

5.1. Установлены следующие метрологические и технические характеристики:

Таблица 1 - Метрологические характеристики

Наименование характеристики	Значение

ОПИСАНИЕ ТИПА СРЕДСТВА ИЗМЕРЕНИЙ

Датчики весоизмерительные PR 6261

Назначение средства измерений

Датчики весоизмерительные PR 6261 (далее - датчики) предназначены для измерений и преобразования воздействующей на датчик силы тяжести взвешиваемого объекта в аналоговый нормированный электрический измерительный сигнал.

Описание средства измерений

Принцип действия датчиков основан на изменении электрического сопротивления тензорезисторов, соединенных в мостовую схему, при их деформации, возникающей в местах наклейки тензорезисторов к упругому элементу датчика, под действием прилагаемой нагрузки. Изменение электрического сопротивления вызывает разбаланс мостовой схемы и появление в диагонали моста электрического сигнала, изменяющегося пропорционально нагрузке.

Датчики состоят из упругого элемента, кабеля питания и измерения, тензорезисторов на клеевой основе, соединенных по полной мостовой электрической схеме, и элементов герметизации. Места наклейки тензорезисторов и расположения элементов термокомпенсации и нормирования в датчиках находятся во внутренней полости упругого элемента и защищены крышками и герметиком.

Модификации датчиков отличаются пределами допускаемой погрешности и максимальной нагрузкой.

Пломбирование датчиков весоизмерительных PR 6261 не предусмотрено.

Рисунок 1 - Внешний вид датчика весоизмерительного PR6261

Лист № 2
Всего листов 4

Маркировка датчиков производится на фирменной наклейке или непосредственно на корпусе датчика (рисунок 2), на которой нанесены:

- торговая марка изготовителя;
- обозначение весоизмерительного датчика;
- серийный номер;
- максимальное значение напряжения питания U_{max};
- максимальная нагрузка E_{max};
- номинальный выходной сигнал C_n;
- длина кабеля;
- год выпуска датчика;
- знак утверждения типа.

Рисунок 2 - Маркировка датчиков

Программное обеспечение
отсутствует.

Поверка
осуществляется по документу Приложение ДА «Методика поверки» ГОСТ 8.631-2013.

Основные средства поверки:

рабочие эталоны 1-го разряда по ГОСТ 8.640-2014 с пределами допускаемых значений доверительных границ относительной погрешности δ = 0,01 %.

Допускается применение аналогичных средств поверки, обеспечивающих определение метрологических характеристик поверяемых СИ с требуемой точностью.

Знак поверки наносится в паспорт.

Сведения о методиках (методах) измерений
приведены в эксплуатационном документе.

3. Beschreibung der Wägezelle / *Description of the load cell*

Die Wägezellen der Baureihe PR 6261 sind Drucklast-Wägezellen. Sie sind aus rostfreiem Stahl hergestellt, die DMS-Applikation ist hermetisch gekapselt. Die wesentlichen Betriebsdaten sind dem Datenblatt in Abschnitt 6 dieser Anlage zu entnehmen.

The load cells of the series PR 6261 are compression load cells. They are made of stainless steel, the strain gauge application is hermetically sealed. Further essential characteristics are given in the data sheet, see section 6 of this annex.

4. Dokumentation / *Documentation*

Die zu diesem Zertifikat gehörenden technischen Unterlagen des Zertifikatsinhabers sind im Zertifizierungs-Dokumentensatz ZDS-DE-15-PC-PTB009 der benannten Stelle hinterlegt. Ein von der benannten Stelle gestempeltes Inhaltsverzeichnis dieses Zertifizierungs-Dokumentensatzes wurde dem Zertifikatsinhaber zugeschickt.

The documents appending to this certificate are deposited at the notified body in the set of certification documentation No. ZDS-DE-15-PC-PTB009. The index of the set of certification documentation has been stamped by the notified body and it has been sent to the owner of the certificate.

5. Weitere Informationen / *Further information*

Fertigungsverfahren, Werkstoffe und Abdichtungen müssen den vorgestellten Mustern und der in der PTB hinterlegten Dokumentation entsprechen; Änderungen sind nur mit Zustimmung der PTB erlaubt.

Die im Datenblatt hinsichtlich Linearität, Umkehrspanne und Temperaturgang angegebenen Fehlergrenzen begrenzen maximal mögliche Einzelfehler eines Musters; der für jedes Muster zulässige Gesamtfehler aus diesen Größen ist durch die Fehlergrenze nach OIML R60 Nr. 5.1 (Hüllkurve) vorgegeben.

Die technischen Daten sowie die Abmessungen der Wägezellen sind im Abschnitt 6 in dieser Anlage enthalten und müssen beachtet werden. Die Wägezellen können nach DIN EN 45501 Nr. 4.12 auch in Waagen der Klasse (IIII) eingesetzt werden.

The manufacturing process, material and sealing of the produced load cells have to be in accordance with the tested patterns; changes are only allowed with the permission of the PTB.

The typical errors related to linearity, hysteresis and temperature coefficient as indicated in the data sheet point out possible single errors of a pattern; however, the overall error of each pattern is determined by the maximum permissible error according to OIML R60 No 5.1.

The technical data, the dimensions of the load cell are given in section 6 of this annex, have to be complied with. The load cells also can be used in weighing instruments of class (IIII) in accordance with DIN EN 45501 No. 4.12.

OIML Certificate of Conformity

OIML Member State
The Netherlands

Number R60/2000-NL1-17.41
Project number 1900903
Page 1 of 2

Issuing authority	NMi Certin B.V. Person responsible: C. Oosterman
Applicant and Manufacturer	Minebea Intec GmbH Meiendorfer Strasse 205 A D-22145 Hamburg Germany
Identification of the certified type	A **compression load cell**, with strain gauges. Type : PR 6261
Characteristics	See next page

This Certificate attests the conformity of the above identified Type (represented by the sample(s) identified in the OIML Test Report) with the requirements of the following Recommendation of the International Organization of Legal Metrology (OIML):

OIML R60 - Edition 2000 (E) for accuracy class C

This Certificate relates only to the metrological and technical characteristics of the type of measuring instrument covered by the relevant OIML International Recommendation above-identified. This Certificate does not bestow any form of legal international approval.

Important note: Apart from the mention of the Certificate's reference number and the name of the OIML Member State in which the Certificate was issued, partial quotation of the Certificate and of the associated OIML Test Report(s) is not permitted, although either may be reproduced in full.

Issuing Authority **NMi Certin B.V., OIML Issuing Authority NL1**

OIML Certificate of Conformity

OIML Member State
The Netherlands

Number R60/2000-NL1-17.41
Project number 1900903
Page 2 of 2

The conformity was established by the results of tests and examinations provided in the associated OIML Test Report(s):

- No. NMi-1900903-01 dated 28 April 2017 that includes 51 pages;
- No. NMi-1900903-02 dated 28 April 2017 that includes 46 pages.

Characteristics of the load cell:

Maximum capacity (E_{max})	125 kg up to and including 4000 kg
Minimum dead load	0 kg
Accuracy Class	C
Rated Output	2,0 mV/V
Maximum number of load cell intervals (n)	3000
Ratio of minimum LC Verification interval $Y = E_{max} / v_{min}$	14000
Ratio of minimum dead load output return $Z = E_{max} / (2 * DR)$	3000
Input impedance	1080 Ω ± 10 Ω
Temperature range	-10 °C / + 40 °C
Fraction p_{LC}	0,7
Humidity Class	CH
Safe overload	150 % of E_{max}
Output impedance	1010 Ω ± 1 Ω
Recommended excitation	10 V AC / DC
Excitation maximum	24 V AC / DC
Transducer material	Stainless steel
Atmospheric protection	Hermetically welded

The characteristics for n_{max} and Y can be reduced separately.

Each produced load cell is provided with an accompanying document with information about its characteristics.

The above identified Type (represented by the sample(s) identified in the OIML Test Report) have been found to comply with the additional national requirements established by the United States of America (NIST Handbook 44 and NCWM Publication 14), included in the MAA Declaration of Mutual Confidence:

- R 60 DoMC-01 rev.0, Additional requirements from the United States;
- R 60 DoMC-02 rev.0, Additional requirements from the United States.

Issued by	NMi Certin B.V.
In accordance with	WELMEC 8.8 Issue 2, WELMEC 2.4 Issue 2, OIML R 60 (2000), EN 45501:2015.
Producer	Minebea Intec GmbH Meiendorfer Strasse 205 A D-22145 Hamburg Germany
Measuring instrument	A **compression load cell**, with strain gauges, tested as a part of a weighing instrument.

Brand : Minebea Intec GmbH
Designation : PR 6261

Further properties are described in the annexes:
- Description TC11066 revision 0;
- Documentation folder TC11066-1.

An overview of performed tests is given in the annex:
- Description TC11066 revision 0.

1 General information about the load cell

All properties of the load cell, whether mentioned or not, shall not be in conflict with the standards mentioned in this certificate.

This certificate is the positive result of the applied voluntary, modular approach, for a component of a measuring instrument, as described in WELMEC 8.8. The complete measuring system must be covered by an EC type-approval certificate, an EC-type examination certificate or an EU-type examination certificate.

1.1 Essential parts

Number	Pages	Description	Remark
11066/0-01	1	Load cell outline	Mechanical
11066/0-02	1	Electrical drawing	Electrical

Cable:
- If the load cell is provided with a 4-wire system:
  - The cable length is mentioned in the accompanying load cell document / on the label;
  - The cable length shall not be modified.
- If the load cell is provided with a 6-wire system (="Remote-sensing"):
  - The cable length is not limited.

The cable shall be a shielded cable, the shield is connected to the load cell.

1.2 Essential characteristics

Maximum capacity (E_{max})	125 kg up to and including 4000 kg
Minimum dead load	0 kg
Accuracy Class	C
Rated Output	2,0 mV/V
Maximum number of load cell intervals (n)	3000
Ratio of minimum LC Verification interval $Y = E_{max} / v_{min}$	14000
Ratio of minimum dead load output return $Z = E_{max} / (2 * DR)$	3000
Input impedance	1080 Ω ± 10 Ω
Temperature range	-10 °C / + 40 °C
Fraction p_{LC}	0,7
Humidity Class	CH
Safe overload	150 % of E_{max}

Description

Number **TC11066** revision 0
Project number 1900903

Output impedance	1010 Ω ± 1 Ω
Recommended excitation	10 V AC / DC
Excitation maximum	24 V AC / DC
Transducer material	Stainless steel
Atmospheric protection	Hermetically welded

The characteristics for n_{max} and Y can be reduced separately.

Each produced load cell is provided with an accompanying document with information about its characteristics.

1.3 Essential shapes

Number	Pages	Description	Remark
11066/0-01	1	Load cell outline	Mechanical

The descriptive markings plate is secured against removal by sealing or will be destroyed when removed and contains at least the information and markings as described in OIML R 60 (2000) and:
- This certificate number TC11066 (in the countries where it is mandatory);
- Producers name or mark.

2 Seals

The connecting cable of the load cell or the junction box is provided with possibility to seal.

3 Conditions for conformity assessment

The compatibility of load cells and indicator is established by the manufacturer by means of the compatibility of modules form, contained in WELMEC 2, 2015 clause 10, at the time of putting into use.

Other parties may use this certificate without the written permission of the producer (WELMEC 8.8).

4 Reports

An overview of performed tests is given in the reports:
- No. NMi-1900903-01 dated 28 April 2017 that includes 51 pages;
- No. NMi-1900903-02 dated 28 April 2017 that includes 46 pages.

A report can be a test report, an evaluation report, a type evaluation report and/or a pattern evaluation report.

NATIONAL TYPE EVALUATION PROGRAM

Certificate of Conformance

for Weighing and Measuring Devices

For:
Load Cell
Compression
Model: PR 6261 Series
n_{min}: 5000, Class III, Multiple Cell
10 000, Class IIIL, Multiple Cell
Capacity: 125 kg to 4000 kg
Accuracy Class: III/IIIL

Standard Features and Options

- The specific load cell models, capacities and v_{min} values covered by this Certificate are listed in the table on Page 2.
- Nominal Output: 2.0 mV/V
- Stainless Steel
- 4 Wire Design
- Minimum Dead Load: 0 kg

Temperature Range: -10 °C to 40 °C (14 °F to 104 °F)

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

James Cassidy
Chairman, NCWM, Inc.

Kristin Macey
Chairman, National Type Evaluation Program Committee
Issued: August 7, 2017

1135 M Street, Suite 110 / Lincoln, Nebraska 68508

The National Conference on Weights and Measures (NCWM) does not approve, recommend or endorse any proprietary product or material, either as a single item or as a class or group. Certificate Number: 17-094
Page 2 of 2

Minebea Intec GmbH

Load Cell / PR 6261 Series

Application: The load cells may be used in multiple cell applications Class III and IIIL consistent with the model designations, number of scale divisions, and parameters specified in this certificate. Load cells of a given accuracy class may be used in applications with lower accuracy class requirements provided the number of scale divisions, the v_{min} value, and temperature range are suitable for the application. The manufacturer may market the load cell with fewer divisions (n_{max}) and with greater v_{min} values than those listed on the certificate. However, the load cells must be marked with the appropriate n_{max} and v_{min} for which the load cell may be used.

Specific Capacities and v_{min} Values:

Model	Capacity	Vmin	
		Class III Multiple Cell, n = 5000	Class IIIL Multiple Cell, n = 10 000
PR 6261 Series	125 kg*	8.9 g	7.8 g
	250 kg	17.8 g	7.8 g
	500 kg	35.7 g	11.9 g
	1000 kg *	71.4 g	23.8 g
	2000 kg	142 g	47.6 g
* load cell tested	3000 kg	214 g	71.4 g
	4000 kg	285 g	95.2 g

Identification: A lasered identification label located on the cell, states manufacturer name, model, serial number, v_{min} and rated capacity. Other pertinent information will be specified on the Calibration Certificate accompanying the cell.

Test Conditions: A 125 kg and a 1000 kg capacity load cell were tested by the NMi Certain B.V. at The Netherlands facility. Testing was conducted in accordance with the OIML DoMC Mutual Acceptance Arrangement, signed by the NCWM as a utilizing participant for load cell testing. Testing was conducted using deadweights as the reference standard. The load cells were tested over a temperature range of -10 °C to 40 °C with tests run on each cell at each temperature. The temperature effect on zero was measured and a time dependence (creep) test was performed. The barometric pressure test to determine sensitivity of the load cell design to changes in barometric pressure was conducted. The data were analyzed for multiple load cell applications. OIML R60 selection criteria were used to determine cells tested.

Evaluated By: S.J. Koeman, M.M.J. Meijer (NMi)

Type Evaluation Criteria Used: NIST, Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices, 2017. NCWM, Publication 14: Weighing Devices, 2017.

Conclusion: The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.
